

Arjuna Technologies Ltd.

“Arjuna Technologies is a leading independent supplier of standards-based middleware technology for reliable distributed systems. Arjuna offers industry-proven transaction processing and reliable messaging products for Web services and J2EE.”

“Arjuna Technologies was formed from the former Hewlett-Packard Arjuna Lab, HP's centre of excellence for transactioning and related technologies. ... Today, Arjuna is working with other industry partners to develop the next generation of Web Services coordination, transaction and process management technology.”
