50		Race/EthnicityClassifications	0..1	Categories used to describe groups to which individuals belong or identify with. The categories represent definitions used by the U.S. Department of Education and other federal agencies to categorize U.S. citizens, resident aliens, and other non-eligible groups. Revised categories for federal reporting were approved by the OMB in October, 1997. An "other" category was added to the standard code set to accommodate broader tracking. Federal reporting of race/ethnicity data is mandatory for all institutions receiving federal financial assistance. 51		Race/EthnicityClassifications New	0..1	The racial and ethnic categories used to classify students. General use of the revised classifications should begin by 2003. Two code sets are suggested for use. Specific data formats to use in reporting race and ethnicity data were being developed by NCES at the time of this report; the formats presented below, therefore, are only proposed. OMB suggests that self-identification should be the preferable method of collecting race/ethnicity and, when feasible, race and ethnicity items should be captured and reported separately (Code Set One). Code Set Two presents a combined code set (containing minimum categories) to use when self-identification is not possible.
