JSR-168 Edit and Help Mode

Did some QA of the Sakai JSR-168 portlet support with Marcus Chirstie and Marlon Pierce of Indiana Unviersity. Found a bug and decided that we needed Help and Edit mode support. Off goes two solid hacking days :)

But code yeilds eventually and I just committed the stuff. Interestingly - this makes my todo list for 168 realy short - and just in time for code freeze.

To test, do this

check out a copy of sakai

The also check out the portlets into the source directory:

svn co <https://source.sakaiproject.org/svn//portlet/trunk/> portlet

and them compile it .

The Sakai Test Portlet shows up in the site list.

TODO:

Re-Enable Sakai API support in portlets when Pluto 1.1.2 is released

Why to we register too many times?

reference/docs/architecture - Update

Fix going to a URL before we are logged in...

Fix look and feel of edit button

DONE

JSR-168 Edit and Help Mode - 22653

Why do we doView more than once? - 22583

Re-enable userInfo capabilities once Pluto 1.1.1 is released

Sakai APIs fully functional in Portlets - done - but commented out - 22164

JSR-168 Preferences - permanently persist in Tool Placement - 22128

PDA - Rename - Done 22111

Test Portlet - Done

Test CSS - Done

Reset - Fixed
PDA Presence - Fixed

My cool SVN statement - merged a branch all by myself!
svn merge -r 21991:HEAD
https://source.sakaiproject.org/svn//portal/branches/experimental_portal_branch/
