

Cal-PASS Project (US)

California Partnership for Achieving Student Success

“Cal-PASS is an initiative that collects, analyzes and shares student data in order to track performance and improve success from elementary school through university. Utilization of the Cal-PASS Core Values represents a new approach to improving education.

Through the Cal-PASS project, elementary, middle, high schools, colleges and universities can learn the answers to [their] questions.”

“Over 6,800 elementary schools, high schools, community colleges, colleges and universities... are already participating in this partnership.”
