

Emory University (US)

“The Methodist Episcopal Church founded Emory College in 1836 in the small Georgia town of Oxford. The founders named the town for the school's prestigious British cousin, and named the school for a bishop who dreamed of an American education that molded character as well as the mind.”

“Emory is one of the nation's leading research universities. ... Students, faculty and staff are pursuing research across schools and departments, in research centers and institutes based on campus, and through interdisciplinary programs, partnerships and affiliations.”
