

## About Perficient

Perficient is a leading technology and management consulting firm serving clients throughout the United States. We are experts in designing, building and delivering business-driven technology solutions. We help our clients gain competitive advantage by using Internet-based technologies to make their businesses more responsive to market opportunities and threats, strengthen relationships with customers, suppliers and partners, improve productivity and reduce information technology costs.

Since 1998, we have delivered successful business-driven technology solutions for hundreds of Global 2000 and other large enterprise customers. During that time, we have grown from a startup to an industry leader leading serving clients from a network of offices across North America and with global delivery centers in China, Eastern Europe and India.

Deep domain expertise with a variety of technology platforms, strong partnerships with the world's leading vendors, dedicated industry expertise and a broad solutions portfolio differentiates our firm. We use small, expert project teams that deliver high-value, measurable results by working collaboratively with clients through a user-centered, technology-based and business-driven solutions methodology. We believe this approach enhances return-on-investment for our clients by significantly reducing the time and risk associated with designing and implementing business and technology solutions.

Our work is routinely recognized by our partners, trade and industry authorities and most importantly, our clients.

At Perficient, we place strong emphasis on building lasting relationships with clients and being 100% referenceable. In each of the past four years, more than 80% of our revenue was derived from repeat business. We believe this reflects our commitment to quality consulting and the long-term partnerships we build with our clients.
