

## *IP.com, Inc. (US)*

“IP.com was founded to fill a growing void in the tools available to the intellectual property community. Our initial product, the IP.com Prior Art Database, was created to provide companies with a fast and effective, centralized outlet for publishing and searching technical disclosures. Since its inception, the IP.com Prior Art Database has continued to grow, attracting such high-profile clients as IBM, General Electric, Motorola, Abbott Laboratories, and Eastman Kodak (to name a few).”
