### Requirements, Standards and Tools:

| Requirements from VERA   | Service Name (for e-Framework) | Standards Considered | Tools Considered | Comments from eReSS |
|--|--------------------------------|----------------------|------------------|---------------------|
| <b>Project management</b>  |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Data/ Meta-data Collection</b>  |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Data/ meta-data storage, discovery and access</b>   |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Collaboration between researchers and Dissemination</b>                                     |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Visualisation and analysis of data/ meta-data</b>   |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Databases and inter-operability of cross-search/ data formats/ visual or analysis tools</b> |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
| <b>Other underlying standards not mentioned above</b>  |                                |                      |                  |                     |
|  |                                |                      |                  |                     |
|  |                                |                      |                  |                     |

**Additional Verbal Discussion and Comments:**
