OSS Watch (UK)

"OSS Watch is an independent, non-advocacy service. We are experts on free and open source software, but we do not insist on it as the solution to every problem, nor are we tied to any particular solutions or providers.

"**For organisations using, or wanting to use, free or open source software** we can provide consultancy, training and support on selection and evaluation of software, engaging with open source communities, licensing and intellectual property issues."
