

## Press Release

# The rSmart Group Teams With IBM on Open Source Sakai Project

Tuesday May 3, 4:00 am ET

PHOENIX, Ariz., May 3 /PRNewswire/ -- The rSmart Group, the leading open source application software company serving higher education, today announced it is teaming with IBM in support of the Sakai Project. The Sakai Project is a community source software development effort involving over 70 institutions. The Sakai Project is building and releasing online course management, collaboration and research team support software based on open source standards and licenses. Select companies like rSmart and IBM have been invited to join the Sakai Project as Sakai Commercial Affiliates (SCA) to provide world-class development and customer support for Sakai software.

Chris Coppola, Vice President of Community Development for The rSmart Group says, "The relationship between The rSmart Group and IBM builds on our commitment and strengthens our ability to deliver trusted open source solutions to the education marketplace." Coppola adds, "We are excited that IBM has joined the Sakai project and look forward to accelerating the pace of development and adoption and distribution of Sakai software, an important contribution to higher education."

Patrick Carey, IBM Business Consulting Services' higher education leader states, "IBM believes that by combining our talents and resources with rSmart, paired with our mutual and passionate interest in higher education, we can create the critical synergies needed for the success of the Sakai project as well as future open source projects."

"IBM's commitment to open source solutions and a services oriented architecture creates a synergy that benefits both companies," says Ray Barker, CEO of The rSmart Group. Barker adds, "The rSmart group is a leader in providing subscription based application support for education institutions that run Sakai and OSPI, an open source ePortfolio application, as well as Kualu, an open source financial system. IBM's products and services allow these institutions to control and customize product design, lower costs, and more efficiently deliver mission critical enterprise IT systems. We intend to fully leverage this unique

combination of capabilities to bring valuable open source solutions to the market."

### **About The rSmart Group**

The rSmart Group is the leading open source application software company serving the higher education market. rSmart packages, certifies, deploys, and supports a suite of enterprise financial and collaborative learning applications for colleges and universities. As an active member of open source projects like OSPI, Quali, and Sakai, rSmart is able to provide its clients with software applications specifically designed to meet the unique needs of institutions of higher education. This collaborative approach allows rSmart to offer colleges and universities open source applications that break their dependence on traditional proprietary software vendors.
