

Products

Trustek Inc has developed an open source campus solution ERP called openecampus. Openecampus ERP is designed to address the most complex business requirements and provide comprehensive business and industry solutions in educations vertical. There's a new emphasis on the whole range of events and touch-points that make up the long-term relationship a student has with a college or university. This relationship can be defined as the student life-cycle. The student life-cycle is the focus of openecampus ERP. Openecampus ERP helps you manage the entire student life-cycle seamlessly-from recruiting to admissions, through student services and alumni relations-in a secure, stable environment. Development of this product is done in co-ordination with our Hyderabad Subsidiary office Astute Business Solutions in India. Our US office is involved in creating software requirements, coding, testing, documentation, sales and customer support.
