The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

Acknowledgments

This publication and the collection of academic library data have been a team effort. First, we would like to thank the academic librarians who provided the information upon which the report is based and library representatives who assisted in this data collection. The American Library Association (ALA) Office of Research and Statistics and the Academic Libraries Survey Technical Working Group were instrumental in designing the survey. Members of the Academic Libraries Survey Technical Working Group during the time of the study were as follows: Denise Davis, ALA; Martha Kyrillidou, Association of Research Libraries; Susan Anderson, Saint Petersburg Junior College; Carolyn F. Norman, California Community Colleges; Leland M. Park, Davidson College; Hugh Thompson, ALA; Lynn K. Chmelir, Washington State University; and William Miller, Florida Atlantic University.

The authors would also like to thank National Center for Education Statistics (NCES) reviewers Jeff Owings, John Sietsema, and Jeff Williams, Elementary/Secondary and Libraries Studies Division; Marilyn Seastrom, Statistical Standards Program; and Bill Sonnenberg, Early Childhood, International, and Crosscutting Studies Division. The authors thank Duc-Le To, of the Institute of Education Sciences (IES) at the U.S. Department of Education for his review of this report.

Thanks to Kevin Bromer, Steven Holtzman, Aparna Sundaram, and Jed Tank, Education Statistics Services Institute, for their technical review. The authors would also like to thank Bruce Daniels and Abe George, Kforce Government Solution, for their contributions to this publication. Thanks also go to Lori Abrams, Hadi Heneveld, Barbara Lynch, and Virginia Robles-Villalba, of Synergy Enterprises, Inc., for their assistance in finalizing this report.

Introduction

This report presents tabulations for the 2004 Academic Libraries Survey (ALS) conducted by the United States Department of Education's National Center for Education Statistics (NCES). An academic library is defined as an entity in a postsecondary institution that provides all of the following: An organized collection of printed or other materials, or a combination thereof; a staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of the clientele; an established schedule in which services of the staff are available to the clientele; and the physical facilities necessary to support such a collection, staff, and schedule. This definition includes libraries that are part of learning resource centers. Branch and independent libraries are defined as auxiliary library service outlets with quarters separate from the central library that houses the basic collection. The central library administers the branches. In ALS, libraries on branch campuses that have separate NCES identification numbers are reported as separate libraries.

These academic libraries are informational resources within degree-granting postsecondary institutions in the United States, including institutions that are eligible for Title IV aid and branch campuses of Title IV, eligible institutions. When academic libraries are referred to in this report, they will always be entities that are part of the degree-granting postsecondary institutions in the United States, including institutions that are eligible for Title IV aid and branch campuses of Title IV, eligible institutions.

The Academic Libraries Survey has been conducted by NCES since 1966 at irregular intervals. Beginning with the 1988 survey, the Academic Libraries Survey has been conducted on a 2-year cycle. The survey focuses on library services, collections, library staff, expenditures, electronic services, and information literacy.

Two appendixes follow this report. Appendix A contains technical notes, survey methodology, methodology tables, and a glossary. Appendix B contains the survey questionnaire and instructions.

Selected Findings

Services

- During Fiscal year (FY) 2004, there were 155.1 million circulation transactions from academic libraries' general collection (table 1).
- During a typical week in the fall of 2004, of the 3,700 academic libraries in the United States, 24 were open 24 hours per day, 7 days per week (table 2).
- During a typical week in the fall of 2004, 1.4 million academic library reference transactions were conducted, including computer searches (table 3).

Collections

- At the end of FY 2004, 218 academic libraries held 1 million or more books, bound serials, and bound government documents (table 4).
- The nation's 3,700 academic libraries held 982.6 million books; serial backfiles; and other paper materials, including government documents at the end of FY 2004 (table 5).
- In FY 2004, academic libraries added 24.6 million books, serial backfiles, and other paper materials, including government documents (table 6).

Staff

- There were about 94,100 full-time equivalent (FTE) staff working in academic libraries during the fall of 2004 (table 7).
- Librarians accounted for 28 percent of the total number of FTE staff in academic libraries during the fall of 2004 (table 7).

Expenditures

- Academic libraries' expenditures totaled \$5.8 billion during FY 2004 (table 8).
- During FY 2004, academic libraries spent \$2.9 billion on salaries and wages, representing 51 percent of total library expenditures (table 9).
- Academic libraries spent \$2.2 billion on information resources during FY 2004 (tables 9 and 10).
- During FY 2004, academic libraries spent \$101.3 million for bibliographic utilities, networks, and consortia (table 11).

Electronic Services

- In 2003-04, some 69 percent of academic libraries provided library reference service by e-mail or the Web (table 12).

Information Literacy

- During 2003-04, about 34 percent of academic libraries reported that their postsecondary institution had incorporated information literacy into its strategic plan (table 13).
- During 2003-04, about 21 percent of academic libraries reported that their postsecondary institution had an institution-wide committee to implement the strategic plan for information literacy (table 13).

¹"Documents delivered from commercial services" refers to all documents from commercial document delivery services received by the library's users. This includes all transactions that the library pays for, even if library staff is not involved in the transaction.

² While "level" and "Carnegie classification" are similar, there is not complete overlap in the two classifications. "Level" refers to the highest level of any degree offered by the institution. The "Carnegie classification" is based on criteria such as institutional mission and research funding in addition to highest level of degree awarded. The Carnegie classification was developed by the Carnegie Foundation for the Advancement of Teaching and published in *A Classification of Institutions of Higher Education, 2000 Edition*.

³ Full-time equivalent (FTE) enrollment is calculated by adding one-third of part-time enrollment to full-time enrollment.

NOTE: The number of doctoral, master's, and bachelor's level institutions does not sum to the total number of 4-year and above institutions because there are 34 4-year and above institutions that grant "other" degrees and are thus not included in the breakdown.

¹ While "level" and "Carnegie classification" are similar, there is not complete overlap in the two classifications. "Level" refers to the highest level of any degree offered by the institution. The "Carnegie classification" is based on criteria such as institutional mission and research funding in addition to highest level of degree awarded. The Carnegie classification was developed by the Carnegie Foundation for the Advancement of Teaching and published in *A Classification of Institutions of Higher Education, 2000 Edition*.

² Full-time equivalent (FTE) enrollment is calculated by adding one-third of part-time enrollment to full-time enrollment.

NOTE: The number of doctoral, master's, and bachelor's level institutions does not sum to the total number of 4-year and above institutions because there are 34 4-year and above institutions that grant "other" degrees and are thus not included in the breakdown.

Specialized	575	323,966,163	166,101,405	51.3	120,721,652	37,143,106
Not classified	333	73,829,302	44,713,428	60.6	21,763,424	7,352,450

¹Includes books, serial backfiles, current serial subscriptions, document delivery/interlibrary loan, preservation, and other expenditures for information resources.

²Includes computer hardware and software; bibliographic utilities, networks, and consortia; furniture and equipment; maintenance costs; and other expenditures not reported elsewhere.

³While "level" and "Carnegie classification" are similar, there is not complete overlap in the two classifications. "Level" refers to the highest level of any degree offered by the institution. The "Carnegie classification" is based on criteria such as institutional mission and research funding in addition to highest level of degree awarded. The Carnegie classification was developed by the Carnegie Foundation for the Advancement of Teaching and published in *A Classification of Institutions of Higher Education, 2000 Edition*.

⁴Full-time equivalent (FTE) enrollment is calculated by adding one-third of part-time enrollment to full-time enrollment.

NOTE: The number of doctoral, master's, and bachelor's level institutions does not sum to the total number of 4-year and above institutions because there are 34 4-year and above institutions that grant "other" degrees and are thus not included in the breakdown.

Appendix A: Technical Notes

Technical Notes

History of Academic Library Survey Data Collection

From 1988 to 1998, the Academic Libraries Survey (ALS) was a part of the Integrated Postsecondary Education Data System (IPEDS). IPEDS is the U.S. Department of Education's vehicle for collecting data from all postsecondary institutions in the United States. Topics included within IPEDS are institutional characteristics, fall enrollment, completions, finance, faculty salaries, and fall staff. Beginning in the year 2000, the ALS began collecting data independent from IPEDS data collection; however, data from the ALS can still be linked to IPEDS data using the institution's UNITID number. IPEDS serves as the frame, or universe of degree-granting postsecondary institutions, from which eligible institutions are selected for the current ALS administration.

Topics covered and time frames

The tables in this publication summarize library services (including electronic services), library staff, library collections, and library expenditures for libraries in degree-granting postsecondary institutions in the 50 states and the District of Columbia. Library staff data are for fall 2004. Library circulation, interlibrary loans, operating expenditures, and library collections data are for fiscal year (FY) 2004. Other library services data are for a typical week in the fall of 2004. Fiscal year 2004 is defined as any 12-month period between June 1, 2003, and September 30, 2004, that corresponds to the institution's fiscal year.

Changes in the survey form and definitions of key terms since 2000

On an as-needed basis, NCES revises the ALS survey form to reflect changes that have occurred in the services, collections, expenditure accounting, and staffing of academic libraries. For example, in 1996, a number of questions were added on electronic services. In 1998, a substantial number of additional changes were made, especially in the collections and expenditures sections. These changes reflect the extensive changes in library services that occurred with regard to the development of electronic media. In 2004, a new set of questions on "information literacy" was added to the questionnaire. For more information about the 2004 Academic Libraries Survey, refer to (<http://nces.ed.gov/surveys/libraries/>).

Methodology

Scope

The Academic Libraries Survey (ALS) was fielded in fall 2004 as a Web-based survey. This survey collects data on libraries in degree-granting postsecondary institutions in the United States. The Academic Libraries data file and this report cover all academic libraries in degree-granting postsecondary institutions in the United States, including institutions that are Title IV program participants, and branch campuses of Title IV program participating institutions.

Coverage and response rates

There were 3,653 degree-granting postsecondary institutions in the 50 states and the District of Columbia that had academic libraries in 2004. The response rate among these 3,653 institutions was 87 percent.

Methodology tables A-1 and A-2 present further information on response rates. The first two rows of table A-1 present the number of academic libraries and the number and percentage of respondents by level and control of institution. The remaining rows show the number and percentage of libraries responding for each item. Table A-2 shows the number and percentage of nonrespondents by control and level of institution and by state.

Data collection procedures

The ALS data are collected and processed for NCES by the U.S. Census Bureau, Governments Division. In 1990, an NCES/IPEDS (Integrated Postsecondary Education Data System) Academic Libraries Survey Improvement Project was begun with the assistance of the National Commission on Libraries and Information Science (NCLIS) and the American Library Association's Office of Research and Statistics (ALA-ORS). The project identified a librarian in each state to work with IPEDS state data coordinators in submitting library data to NCES. For the 1990, 1992, 1994, 1996, and 1998 data collections, many of those library representatives took major responsibility for collecting data in their states. Since 2000, the ALS is no longer a component of the IPEDS package of surveys. ALS data can still be linked to IPEDS institutional data using the institution's UNITID number. For the 2004 Web-based data collection, state-level library representatives were available to promote prompt responses from librarians and to assist in problem resolution when anomalies were discovered in responses from the academic librarians.

Editing and Imputation

The Web-based data collection application features internal consistency edit checks as well as a few range checks and summation checks.

The edit checks provide warnings as the data are being entered into the web application and an edit report after the data have been entered. The types of edit checks are listed below:

Summations - reported totals are compared with the sums of the component data items. If they are not equal, a warning message is generated.

Relational edit checks - the program compares responses entered in one section of the questionnaire with responses entered in another section of the questionnaire for consistency. For example, if a librarian reports that books and bound serials were added during the fiscal year, the program would look for some expenditure to be reported for books and bound serials. If the former is reported without the latter, an error message is generated. Another example is that the number of volumes of print materials added during the fiscal year cannot exceed the total number of volumes held at the end of the fiscal year.

Range checks - an error message is generated if responses are above or below expected amounts. For example, if the average salary of librarians is reported as less than \$20,000 or greater than \$100,000, an error message is generated. If the reported hours of service are greater than 168 hours per week, an error message is generated.

After the data were received by NCES from every state, the data files were merged and general edits and imputations were performed. Some examples of general edits and imputations follow:

Edits

In addition to the summations, relational edit checks, and range checks described above, the following edits were performed in data review:

Current year/prior year comparisons – current year data must fall within the range of 50 to 150 percent of data for the prior reporting period.

Ratios – the ratio of one item to another must not exceed a limit, such as the ratio of salaries and wages to staff exceeds an upper limit and is not reasonable for that position.

Item comparison — one item should not exceed another, such as books added during the year should not exceed books held at the end of the year.

Imputations

After editing, there is still missing data. Imputation is the process of filling missing data with reasonable values in order to have a complete data set.

For estimation, institutions were grouped into 27 imputation cells. The imputation cells were determined based on sector and full-time equivalent (FTE) enrollment. The sector categories used are (1) public, 4-year or above; (2) private non-profit, 4-year or above; (3) private for profit, 4-year or above; (4) public, 2-year; (5) private non-profit, 2-year; and (6) private for profit, 2-year.

If a value was missing and prior year (FY 2002) data were available and were not expected to change, then the missing value was filled with the value in the prior year. For example, the number of reported Branches and Independent Libraries (Part A, line item 1) is likely to remain constant from year to year, so the prior year value was brought forward.

If a value was missing, prior year data were available, and the value is expected to change from the prior year, then the missing value was filled with the prior year value multiplied by the median growth rate within the imputation cell. For example, the number of Full-time Librarians (Part B, line item 2, column 1) is expected to change from year to year, so this imputation method is used.

If a value was missing and prior year data were unavailable, then data were imputed using the current year median cell distribution ratio. For example, impute E-books Added (Part D, line item 23, column 1) using the value of E-books Held (Part D, line item 23, column 2) multiplied by the median cell distribution ratio of E-books Added to E-books Held.

If there were missing current year data that prevented the use of a current year median cell distribution ratio, then the current year cell median was imputed. For example, if it was not possible to impute E-books Added using a current year median cell distribution ratio because E-books Held was missing, then E-books Added was imputed with the current year cell median.

After imputation, if a total was missing or known to need adjustment, then the total was readjusted to equal the sum of its detail items.

No Electronic Services items in Part G were imputed because the questions were yes/no questions. Also, no items in Part H were imputed because the information literacy items were yes/no questions.

The use of FTE to determine imputation cells was not employed until 2002. The procedure of using medians instead of means for imputation also represents a change from past survey cycles. While research indicates that the effect of the change in imputation procedure was not large, caution should be exercised in making comparisons with 2000 or earlier reports.

Classifications used in the report

The tables in this report present the data by control (public, private); level of highest degree offered--a categorization based on the IPEDS classification of the highest degree awarded by the institution (doctor's, master's, bachelor's, and less than 4-year); size of full-time equivalent (FTE) enrollment (less than 1,500; 1,500 to 4,999; 5,000 or more); and the institution's 2000 Carnegie Classification.

Caution on the use of data by state, and by level and control of institution

This is a descriptive report that focuses on information from a census of academic libraries in 2004. The presentation of numbers, proportions, and percentages is descriptive only of libraries in the period referenced. While data were imputed for nonresponse, the number of unit nonresponses can vary by state and affect the reliability of the state data. See Methodology table A for item response rates by level and control of institution. Methodology table B presents the distribution of the set of unit nonrespondents by state and by level and control of institution. Methodology table C gives the number of academic libraries by state, level, and control of institution. The data user should be especially cautious in using data at a level of detail where the nonresponse rate was 15 percent or greater.

Table A-1. Number and percentage of academic libraries, by level, control of institution, and item: 2004

	Total post-secondary degree granting institutions		4-year institutions								Less than 4-year		Public		Private	
			Total 4-year institutions				Highest level of degree				Total res-ponding	Percent	Total res-ponding	Percent	Total res-ponding	Percent
			Total 4-year institutions		Doctor's		Master's		Bachelor's							
			Total res-ponding	Percent	Total res-ponding	Percent	Total res-ponding	Percent	Total res-ponding	Percent						
All institutions	3,653	100.0	2,217	100.0	597	100.0	918	100.0	668	100.0	1,436	100.0	1,581	100.0	2,072	100.0
Responding libraries	3,178	87.0	1,968	88.8	545	91.3	817	89.0	578	86.5	1,210	84.3	1,458	92.2	1,720	83.0
Part B-Library staff																
Number of FTEs																
Librarians	3,166	86.7	1,965	88.6	544	91.1	816	88.9	577	86.4	1,201	83.6	1,454	92.0	1,712	82.6

SOURCE: U.S. Department of Education, National Center for Education Statistics, Academic Libraries Survey, 2004.

Glossary

Academic library: An entity in a postsecondary institution that provides an organized collection of printed or other materials, or a combination thereof; a staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of the clientele; an established schedule in which services of the staff are available to the clientele; and the physical facilities necessary to support such a collection, staff, and schedule. This definition includes libraries that are part of learning resource centers.

Associate's colleges: These institutions offer associate's degree and certificate programs but, with few exceptions, award no baccalaureate degrees. This group includes institutions where, during the period studied, bachelor's degrees represented less than 10 percent of all undergraduate awards.

Audiovisual materials: Units of all library materials that are displayed by visual projections or magnification or through sound reproduction.

Baccalaureate/associate's colleges: These institutions are undergraduate colleges where the majority of conferrals are below the baccalaureate level (associate's degrees and certificates). During the period studied, bachelor's degrees accounted for at least ten percent of undergraduate awards.

Baccalaureate colleges—general: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded less than half of their baccalaureate degrees in liberal arts fields.

Baccalaureate colleges—liberal arts: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded at least half of their baccalaureate degrees in liberal arts fields.

Bibliographic utilities, networks and consortia: Services provided by national, regional, and local bibliographic utilities networks, and consortia.

Books, serial backfiles, and other paper materials (including government documents): The number of volumes of printed, typewritten, handwritten, photocopied, or processed work.

Branch and independent libraries: Auxiliary library service outlets with quarters separate from the central library that houses the basic collection. The central library administers the branches. In ALS, libraries on branch campuses that have separate NCES identification numbers are reported as separate libraries.

Carnegie classification: A grouping of degree-granting postsecondary institutions into categories developed by the Carnegie Foundation for the Advancement of Teaching. The categorization is based on a combination of levels of degrees awarded and research funding levels. The Carnegie Classification categories used are as follows: Doctoral/Research; Master's I and II; Baccalaureate; Baccalaureate/Associates; Associates; and Specialized. For table presentation, "level I" and "level II" of the Carnegie Classifications were combined. Institutions that do not have a Carnegie Classification are assigned to a "not classified" category.

Computer hardware and software operating expenditures: These include expenditures from the library budget for computer hardware and software used to support library operations, whether purchased or leased, mainframe or microcomputer. Expenditures for maintenance and the expenditure to run information services when it cannot be separated from the price of the product are also included in this category.

Control categories: Institutional control categories are public, private not-for-profit, and private for profit.

Control (of institution): A specification of whether an institution (postsecondary) is operated by publicly elected or appointed officials (public control) or by privately elected or appointed officials and derives its major source of funds from private sources (private control) or public sources (public control).

Current serial subscriptions: The total number of subscriptions in all formats, including electronic. Government documents received serially are included if they are accessible through the library's catalog.

Degree-granting status: Degree-granting institutions offer an associate's, bachelor's, master's, doctor's, or a first-professional degree. Non-degree-granting institutions offer certificates or other formal awards.

Doctoral/research universities—extensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded 50 or more doctoral degrees per year across at least 15 disciplines.

Doctoral/research universities—intensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded at least ten doctoral degrees per year across three or more disciplines, or at least 20 doctoral degrees per year overall.

Document delivery and interlibrary loan expenditures: These include fees paid for photocopies, costs of facsimile transmission, royalties, and access fees paid to bibliographic utilities.

Documents delivered from commercial services: All documents from commercial document delivery services received by the library's users. This includes all transactions that the library pays for, even if library staff is not involved in the transaction.

E-Books: The number of electronic monographs.

Electronic reference sources and aggregation services: This includes citation indexes and abstracts; full-text reference sources (e.g. encyclopedias, almanacs, biographical and statistical sources and other quick fact-finding sources); full-text journal and periodical article collection services (e.g. EBSCOhost, ProQuest, Academic Universe, and INFOTRAC OneFile); dissertation and conference proceedings databases. Licensed electronic resources also include those databases that institutions mount locally.

Electronic services: Covers the availability of electronic services provided by the library, including consortial services.

Fringe benefits: Benefits paid from the library budget.

Full-time equivalent (FTE) employees: FTE is a measure of the number of employees based on hours worked. The total number of hours for all part-time positions is divided by the number of hours the library uses to define a part-time position. Therefore, if a 40 hour work week is the standard full-time position, 2 part-time employees, each working 30 hours a week would be the equivalent of 1.5 full-time employees (60 / 40).

Full-time equivalent (FTE) student: FTE student is calculated based on the number of full-time students enrolled plus one-third of the number of part-time students.

Gate count of visitors to library per typical week: Gate count is the number of persons who physically enter library facilities over the course of a week. A single person can be counted more than once.

General circulation transactions: Initial checking out of items, either manually or electronically, by patrons. The count also includes renewals of items, each of which is a circulation transaction.

Information literacy: The set of skills needed to find, retrieve, analyze, and use information.

Information resources expenditures: Expenditures for the following materials and services: *Books, serial backfiles, and other materials* are expenditures for published materials in all formats except current serial subscriptions; *Electronic* are expenditures that are not current serials (i.e., are non-subscription, one-time, or monographic in nature) for software and machine-readable materials considered part of the collections. Examples include periodical backfiles, literature collections, one-time costs for JSTOR membership, etc; and *Audiovisual* are expenditures for all library materials that are displayed by visual projection or magnification or through sound reproduction or both.

Interlibrary loan transactions: The numbers of filled requests for materials provided to other libraries or received by the library from another library. This includes originals and copies, and materials sent by electronic submission.

IPEDS: The Integrated Postsecondary Education Data System: IPEDS is the core postsecondary education data collection program for the National Center for Education Statistics. This data collection program is designed to collect information about all postsecondary institutions and organizations in the 50 States, District of Columbia, and the respective outlying areas.

Level categories: Levels range from 4-year and higher (4 year), 2-but-less-than 4-year (2 year), and less than 2-year.

Level (of institution): A specification of whether a postsecondary education institution's programs are 4-year or higher (4 year), 2-but-less-than 4-year (2 year), or less than 2-year.

Librarians: This is the FTE (Full Time Equivalent) of staff whose duties require professional education (the master's degree or its equivalent) in the theoretical and scientific aspects of librarianship.

Master's colleges and universities I: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 40 or more master's degrees per year across three or more disciplines.

Master's colleges and universities II: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 20 or more master's degrees per year.

Microforms: Units of all photographic reproduction of textual, tabular, or graphic materials reduced in size so that they can be used only with magnification.

Number served in information services/presentations to groups: This is the number of individuals served in presentations that were sponsored by the library and planned in advance. The presentation may cover instruction in library use, or cultural, recreational or educational presentations. Presentations given off the library site are included, as long as the library is the sponsor.

Other (FTE) paid staff: Other paid staff is all other FTE (Full Time Equivalent) staff, except student assistants. This category includes clerical and technical staff but excludes maintenance and custodial staff.

Other (FTE) professional staff: This is the FTE (Full Time Equivalent) count of professional staff other than Librarians. The duties of these staff members require an education and or training in related fields (e.g., academic disciplines, archives, media, and computing).

Postsecondary Institution: Postsecondary education institution has as its sole purpose or one of its primary missions, the provision of formal instructional programs with a curriculum that is designed primarily for students who are beyond the compulsory age for high school. This includes academic, vocational, and continuing professional education programs, and excludes avocational and adult basic education programs.

Preservation: This is a category of expenditures associated with maintaining library and archival materials for use in their original form or some other usable way. Examples of this are rebinding, de-acidification, lamination, and materials conservation.

Public service hours per typical week: The number of hours the physical facility is open for service.

Reference transactions (including computer searches): These are information contacts that involve the knowledge, use, recommendation, interpretation, or instruction in the use of one or more information sources by a member of the library staff. Information sources may include printed (e.g., book volumes) and non-printed (e.g., microforms) materials and machine-readable databases (e.g., those on CD-ROMS). The transaction may include providing direction to services outside the library.

Reserve circulation transactions: Transactions that include those items that have been removed from circulation and set aside so they can be available for a certain course or activity.

Salaries and wages: This category of expenditures includes compensation for full- and part-time employees before deductions and includes hourly pay to student assistants.

Sector: One of nine categories into which postsecondary institutions may be divided based on their control and level.

Specialized Institutions: These institutions offer degrees, ranging from the bachelor's to the doctorate, and typically award a majority of degrees in a single field.

Student assistants (FTE): This is the FTE count of students employed on an hourly basis to work on library-related tasks. This group includes both students whose wages are paid from funds under the library budget and those paid from other budgets, including the College Work-Study Program.

Title IV Institution: An institution that has a written agreement with the Secretary of Education that allows the institution to participate in any of the Title IV federal student financial assistance programs (other than the State Student Incentive Grant (SSIG) and the National Early Intervention Scholarship and Partnership (NEISP) programs).

Total expenditures: This includes the sum of all expenditures listed in the expenditures section of the survey.

Total salaries and wages: Expenditures for full-time and part-time salaries and wages before deductions and include hourly pay to student assistants.

Appendix B: Survey Questionnaire and Instructions

ACADEMIC LIBRARIES SURVEY

SURVEY ELIGIBILITY

Please answer the following questions to determine if you need to complete this survey:

- | | | |
|----|--|--------|
| a. | Do you have an organized collection of printed or other materials or a combination thereof? | Yes/No |
| b. | Do you have paid staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele? | Yes/No |
| c. | Do you have an established schedule in which services of the staff are available to clientele? | Yes/No |
| d. | Does the library have the physical facilities necessary to support such a collection, staff, and schedule? | Yes/No |

(This question will popup if any of the 4 questions above are answered no.)

- | | | |
|----|--|--------|
| e. | Do you provide financial support to another library? | Yes/No |
|----|--|--------|

ACADEMIC LIBRARIES SURVEY

PART A – NUMBER OF PUBLIC SERVICE OUTLETS, FY 2004

Line No.	Item	Number
01	Branch and independent libraries – Exclude main or central library	_____

PART B – LIBRARY STAFF, FALL 2004 AND SALARIES/WAGES, FY 2004

(Exclude maintenance and custodial staff, volunteers and contributed services staff)

Note: Report FTE data to two decimals.

Line No.	Staff	FALL 2004 Number of full-time equivalents (FTEs) (1)	FY 2004 Salaries and wages (whole dollars only) (2)
02	Librarians	_____	
03	Other professional staff	_____	
04	Total librarians and other professional staff (sum lines 02 and 03, col. 1)	_____	\$ _____
05	All other paid staff (except student assistants)	_____	\$ _____
06	Student assistants from all funding sources	_____	\$ _____
07	Total full-time equivalent (FTE) staff (sum lines 04 through 06, cols. 1 & 2)	_____	\$ _____

PART F – LIBRARY SERVICES, TYPICAL WEEK, FALL 2004

Note: See instructions for exclusions and definitions.

Line No.	Services	Number in a typical week
37	Number of weekly public service hours	_____
38	Gate count in a typical week	_____
39	Reference transactions in a typical week	_____

ACADEMIC LIBRARIES SURVEY

PART G – ELECTRONIC SERVICES

Please respond to each item by selecting “Y” or “N”. If answering for more than one library, select “Y”, if at least one has the service. If the answer was “yes” at any time during the academic year, respond “yes”.

Line No.	Services	Yes/No
	Does your library provide the following?	
40	Documents digitized by the library staff	_____
41	Library reference service by e-mail or the Web	_____
42	Technology to assist patrons with disabilities (e.g., TDD, specially equipped work stations)	_____
43	Electronic theses and dissertations produced by your students	_____
	Consortial services:	
44	Does your state have one or more state subsidized library consortium that provides access to electronic resources? If no, select “N” and skip to line 48.	_____
45	Does your library participate in the consortium? If no, select “N” and skip to line 48.	_____
46	Is the cost of your library’s participation fully funded by the state? If yes, select “Y” and skip to line 48.	_____
47	Is the cost of your library’s participation partially funded by the state?	_____
48	Does your library participate in any other consortia for access to electronic resources?	_____

ACADEMIC LIBRARIES SURVEY

PART H – INFORMATION LITERACY

During the academic year 2003-2004, has the academic institution supported information literacy in any of the following ways? Please respond to each item by selecting “Yes” or “No”.

Line

No. Does your institution have the following, or has it done the following?

Yes/No

- | | |
|--|-------|
| 49. A definition of information literacy or of an information literate student | _____ |
| 50. Incorporated information literacy in the institution’s mission | _____ |
| 51. Incorporated information literacy in the institution’s strategic plan | _____ |
| 52. An institution-wide committee to implement the strategic plan for information literacy | _____ |

ACADEMIC LIBRARY SURVEY

INSTRUCTIONS

GENERAL INSTRUCTIONS

Please respond to each item in this survey in the place provided. If the appropriate answer for an item is zero or none, use "0." If you do not collect data for an item, provide your best estimate. **PLEASE DO NOT LEAVE ANY ITEMS BLANK.** If an item is left blank, NCES will estimate a value using the average for institutions with similar characteristics. Include data for the main or central library and all branch and independent libraries that were open all or part of fiscal year 2004.

LIBRARY - An entity that provides all of the following:

1. An organized collection of printed or other materials or a combination thereof
2. A paid staff trained to provide and interpret such materials as required to meet the informational, cultural, recreational, or educational needs of clientele
3. An established schedule in which services of the staff are available to clientele
4. The physical facilities necessary to support such a collection, staff, and schedule.

This includes libraries that are part of learning resource centers.

PERIOD OF REPORT - Report information for the following time periods as specified in each section:

1. **Fiscal year 2004** - Any 12-month period between **June 1, 2003 and September 30, 2004** which corresponds to your institution's fiscal year (for Parts A, B, C, D, and E).
2. **Typical week, Fall 2004** - A typical week is one that is neither unusually busy nor unusually slow. Avoid vacation periods for key staff or days when unusual events are taking place on the campus or in the library. Choose a week in which the library is open its regular hours. Include any seven consecutive calendar days (for Part F).
3. **Fall 2004** - The period during the fall of 2004 when the survey form is being completed (for Parts B, F, G, and H).

PART A - NUMBER OF PUBLIC SERVICE OUTLETS, FISCAL YEAR 2004

Branch and independent libraries (line 01) - Report the number of branch and independent libraries at your institution that were open all or part of fiscal year 2004. **EXCLUDE THE MAIN OR CENTRAL LIBRARY.** Branch and independent libraries are defined as auxiliary library service outlets with quarters separate from the central library of an institution, which have a basic collection of books and other materials, a regular staffing level, and an established schedule.

Branch and independent libraries are administered **either** by the central library **or**, as in the case of some libraries (such as law, medical, etc.), through the administrative structure of other units within the university. Departmental study/reading rooms are *not included*. Include data for all branch and independent libraries on the campus. Include libraries on **branch campuses** (i.e., located in another community) if those campuses are registered under the same NCES UNITID number as the main campus.

PART B – LIBRARY STAFF, FALL 2004 AND SALARIES/WAGES, FY 2004

Column (1), Full-time equivalent (FTE) employees (lines 02-07) - Report the number of filled or temporarily vacant FTE positions during Fall 2004 paid from funds under library control. To compute FTEs of part-time employees and student assistants, take the TOTAL number of hours worked per week by part-time employees IN EACH CATEGORY and divide it by the number of hours CONSIDERED BY THE REPORTING LIBRARY TO BE A FULL-TIME WORK WEEK (e.g., 60 hours per week of part-time work divided by 40 hours per full-time week equals 1.50 FTE). Data should be reported to two decimal places.

Do NOT report contributed services staff, such as members of religious orders, whose services are valued by bookkeeping entries rather than by full cash transactions. DO NOT include volunteers.

Column (2), Salaries and wages (lines 04-07) - Report expenditures in FY 2004 for full-time and part-time salaries and wages before deductions. Exclude employee fringe benefits provided by your institution for all regular library staff that may be reported on line 08b. Include salaries and wages from all sources paid to students serving on an *hourly basis*, if available (e.g., College Work Study Program). *Exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Librarians (line 02) - Report the total FTE of staff whose duties require professional education (the master's degree or its equivalent) in the theoretical and scientific aspects of librarianship.

Other professional staff (line 03) - Report the total FTE of staff whose duties require education and/or training in related fields (e.g., academic disciplines, archives, media, computing).

Total librarians and other professional staff (line 04) - Report the sum of lines 02 and 03, column 1.

All other paid staff (except student assistants) (line 05) - Report the total FTE of all other library staff who are paid annual salaries or hourly wages except students *paid hourly*, who are reported on line 06. Include technical and clerical staff, but *exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Student assistants from all funding sources (line 06) - Report the total FTE of student assistants, employed on an hourly basis whose wages are paid from funds under library control or from a budget other than the library budget, including College Work Study Program. *Exclude* maintenance and custodial staff, volunteers, and contributed services staff.

Total FTE staff (line 07) - Report the sum of lines 04 through 06, columns 1 and 2.

Employee fringe benefits (line 08a) — If benefits are paid from the library budget, select “Y” and report the amount in line 08b. If benefits are not paid from the library budget, select “N” and skip to Part C, line 10.

(line 08b) - If benefits are paid from the library budget, report the amount here.

PART C – LIBRARY EXPENDITURES, FISCAL YEAR 2004

Total salaries and wages (line 09) – This line will automatically be filled in from the total Salaries and Wages Expenditures line 07, column 2, in Part B.

Expenditures on information resources and operations (lines 10-21) - Report funds expended by the library in fiscal year 2004 (regardless of when received) from its regular budget and from all other sources; e.g., research grants, special projects, gifts and endowments, and fees for services. If items in this section are not paid from the library budget but can be easily identified in other parts of the institution's budget, report them here. Expenditures should be reported for the 12-month period that corresponds to your library's fiscal year between the calendar period June 1, 2003 to September 30, 2004. All expenditures should be reported in whole dollars in the most appropriate category to provide an unduplicated count of expenditures. *Exclude institutional expenditures for new buildings and building renovation.*

Information resources (lines 10-17) -

Books, serial backfiles, and other materials (one time purchases) (line 10) - Report expenditures for published materials in all formats except current serial subscriptions.

Electronic (line 11) - Report expenditures that are not current serials (i.e. are non-subscription, one-time, or monographic in nature) for software and machine-readable materials considered part of the collections. Examples include periodical backfiles, literature collections, one-time costs for JSTOR membership, etc. These expenditures have already been reported as part of line 10 above. Therefore, line 11 is not added into Total Expenditures on line 21.

Audiovisual (line 12) – Report expenditures for all library materials that are displayed by visual projection or magnification or through sound reproduction, or both, including graphic materials, audio materials, motion pictures, video materials, and special visual materials such as three-dimensional materials. These expenditures have already been reported as part of line 10 above. Therefore, line 12 is not added into Total Expenditures on line 21.

Current serial subscriptions (ongoing commitments) (line 13) - Report expenditures for current subscriptions to serials in all formats. These are publications issued in successive parts, usually at regular intervals, and, as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies.

Electronic serials (line 14) – Report subscription expenditures (or those which are expected to be ongoing commitments) for serial publications whose primary format is electronic. Examples include paid subscriptions for electronic journals and indexes/abstracts available via the Internet, CD-ROM serials, and annual access fees for resources purchased on a “one-time” basis, such as literature collections, JSTOR membership, etc. These expenditures have already been reported as part of line 13. Therefore, line 14 is not added into Total Expenditures on line 21.

Other Information Resources (lines 15-17) -

Document delivery/interlibrary loan (line 15) - Report expenditures for document delivery and interlibrary loan services. Include fees paid for photocopies, costs of facsimile transmission, royalties and access fees paid to provide document delivery or interlibrary loan. Include fees paid to bibliographic utilities if the portion paid

for interlibrary loan can be separately counted. *Do not count* expenditures related to transactions between the main or central library and any libraries reported in Part A, transactions between libraries reported in Part A, or expenditures for on campus delivery.

Preservation (line 16) - Report expenditures associated with maintaining library and archival materials for use either in their original physical form or in some other usable way. This includes but is not limited to binding and rebinding, materials conservation, deacidification, lamination, and restoration. *Do not include* staff salaries and wages.

Other expenditures for information resources (line 17) – Report any other collection expenditures not already included on lines 9, 12, 14, and 15, such as expenditures for cartographic materials and manuscripts. Include copyright fees and fees for database searches, e.g. (DIALOG, Lexis-Nexis).

Operating Expenditures (lines 18-20)

Computer hardware and software (line 18) - Report expenditures from the library budget for computer hardware and software used to support library operations, whether purchased or leased, mainframe or microcomputer. Include expenditures for maintenance. Include the expenditure for equipment used to run information service products when that expenditure can be separated from the price of the product. *Exclude* expenditures reported on line 14.

Bibliographic utilities, networks, and consortia (line 19) - Report expenditures for services provided by national, regional, and local bibliographic utilities, networks, and consortia. *Exclude* expenditures already reported on lines 11, 14, and 15.

All other operating expenditures (line 20) - Report all other expenditures not already reported on lines 09 through 18 except employee fringe benefits that are reported on line 08b. *Exclude* expenditures for new buildings and building renovations. Include all expenditures for furniture and equipment except computer hardware, which should be reported on line 18. Include any related maintenance costs.

Total Expenditures (line 21) - Report the sum of lines 09, 10, 13, 15 through 20.

PART D - LIBRARY COLLECTIONS, FISCAL YEAR 2004

Enter “Y” or N” to indicate if the library collection is entirely electronic or not.

NOTE - This section of the survey collects data on selected types of material. It does not cover all materials.

Column (1), Total number added during fiscal year - Report the gross number of each category added. Do not subtract the number withdrawn.

Column (2), Total number held at end of fiscal year - Report the total number of each category held at end of fiscal year. To get this figure, take the total number held at the end of the previous fiscal year, add the number added during the fiscal year just ended and subtract the number withdrawn during that period.

Books, serial backfiles and other paper materials (include government documents) (line 22) – Report the number of volumes using the ANSI/NISO Z39.7-1995 definition for volume, which is as follows: *A single physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, distinguished from*

other units by a separate binding, encasement, portfolio, or other clear distinction, which has been catalogued, classified, and made ready for use, and which is typically the unit used to charge circulation transactions.

Include duplicates and bound volumes of periodicals. For purposes of this questionnaire, unclassified bound serials arranged in alphabetical order are considered classified. Exclude microfilms, maps, nonprint materials, and uncataloged items. Include Government document volumes that are accessible through the library's catalogs regardless of whether they are separately shelved. "Classified" includes documents arranged by Superintendent of Documents, CODOC, or similar numbers. "Cataloged" includes documents for which records are provided by the library or downloaded from other sources into the library's card or online catalogs.

E-Books (line 23) – Report the number of electronic monographs that have been purchased by your library and are accessible through the library's catalog. Include e-books you have purchased individually or collaboratively.

Microforms (line 24) – Report units of all photographic reproduction of textual, tabular, or graphic materials reduced in size so that they can be used only with magnification. Examples of microforms are roll microfilm, microcard, microfiche, and ultrafiche.

Audiovisual Materials (line 25) – Report units of all library materials that are displayed by visual projection or magnification or through sound reproduction, or both, including graphic materials, audio materials (include audio books), motion pictures, video materials, and special visual materials such as three-dimensional materials.

Current serial subscriptions (line 26) – Report the total number of subscriptions in all formats. If the subscription comes in both paper and electronic form, count it twice. Count each individual title if it is received as part of a publisher's package (e.g., Project MUSE, JSTOR, Academic IDEAL). Report each full-text article database such as Lexis-Nexis, ABI/INFORM as one subscription in line 27. Include paper and microfilm government documents issued serially if they are accessible through the library's catalog.

Electronic reference sources and aggregation services (line 27) – This includes citation indexes and abstracts; full-text reference sources (e.g. encyclopedias, almanacs, biographical and statistical sources and other quick fact-finding sources); full-text journal and periodical article collection services (e.g. EBSCOhost, ProQuest, Academic Universe, and INFOTRAC OneFile); dissertation and conference proceedings databases. Licensed electronic resources also include those databases that institutions mount locally.

PART E - LIBRARY SERVICES, FISCAL YEAR 2004

Interlibrary loans (lines 28-32) - On lines 28a, 28b, and 29, report the number of filled requests for material provided to other libraries. On lines 30, 31, and 32, report the number of filled requests for material received from other libraries. *Do not include* transactions between the main or central library and any libraries reported in Part A or transactions between libraries reported in Part A.

Returnables (lines 28a and 30) - Report materials that the supplier/lending library expects to have returned. Examples of returnables include books, dissertations and theses, microfilm reels, sound recordings, and audiovisual material.

Non-returnables (lines 28b and 31) - Report materials that the supplier/lending library does not expect to have returned. Examples of non-returnables include photocopies or facsimiles, fiche-to-fiche copies, print copies

from microfilm, electronic full-text documents, and gratis print copies of unpublished reports and/or departmental working papers.

Total loans (lines 29 and 32) - Sum lines 28a and 28b for line 29, and sum lines 30 and 31 for line 32.

Documents delivered from commercial services (line 33) - Report the number of documents from commercial document delivery services received by your users. Count all transactions for which the library pays even if library staff is not involved in the transaction. Include documents received by regular or express mail, by fax, or in electronic form.

General circulation transactions (line 34a) - Report the number of items lent from the general collection. Include both initial transactions and renewals. Do not include e-book circulation.

Reserve circulation transactions (line 34b) - Report reserve transactions of all types, including electronic. Include both initial transactions and renewals.

Information services to groups (lines 35 and 36) - Report the total number of presentations (line 35) and the total number of persons attending or served by those presentations (line 36). Information services to groups are presentations at which a staff member or person invited by a staff member provides information intended for a number of persons and planned in advance. These services may be either bibliographic instruction or library use presentations, or cultural, recreational, or educational presentations. Presentations both on and off the library premises should be included, as long as they are sponsored by the library. *Do not include* meetings sponsored by other groups using library meeting rooms.

PART F - LIBRARY SERVICES - TYPICAL WEEK, FALL 2004

Collect data during a typical week in the fall. A typical week is one that is neither unusually busy nor unusually slow. Avoid vacation periods for key staff or days when unusual events are taking place on the campus or in the library. Choose a week in which the library is open its regular hours. Include any seven consecutive calendar days. If waiting for a typical week in Fall 2004 will delay this form, please use typical week data from the preceding fiscal year. If you have data for the entire year, divide by the number of weeks that the library was open.

Number of weekly public service hours (line 37) - Report an unduplicated count of the total public service hours for physical libraries per typical full-service week (i.e., no holidays or other special accommodations) across both main library and branches using the following method (corresponds to IPEDS): If a library is open from 9:00 a.m. to 5:00 p.m. Monday through Friday, it should report 40 hours per week. If several of its branches are also open during these hours, the figure remains 40 hours per week. Should Branch A also be open one evening from 7:00 p.m. to 9:00 p.m., the total hours during which users can find service somewhere within the system becomes 42 hours per week. If Branch B is open the same hours on the same evening, the count is still 42, but if Branch B is open two hours on another evening, or remains open two hours later, the total is then 44 hours per week. **Exclude 24-hour unstaffed reserve or similar reading rooms.** The maximum total is 168 (i.e., a staffed reading room open 7 days per week, 24 hours per day).

Gate count in a typical week (line 38) - Report the number of persons who physically enter library facilities in a typical week. It is understood that a single person may be counted more than once.

Reference transactions in a typical week (line 39) - Report the total number of reference transactions in a typical week. A reference transaction is an information contact that involves the knowledge, use, commendation, interpretation, or instruction in the use of one or more information sources by a member of the library staff. Information sources include printed and non-printed materials, machine-readable databases (including assistance with computer searching), the Web, catalogs and other holdings records, and, through communication or referral, other libraries and institutions, and persons both inside and outside the library. Include transactions in person, by phone, by e-mail, by the Web, and count transactions that take place at the reference desk, as well as elsewhere. Include information and referral services. If a contact includes both reference and directional services, it should be reported as one reference transaction. When a staff member utilizes information gained from a previous use of information sources to answer a question, report as a reference transaction, even if the source is not consulted again during this transaction. Duration should not be an element in determining whether a transaction is a reference transaction.

Do not report directional transactions here. A directional transaction is an information contact which facilitates the use of the library in which the contact occurs and which does NOT involve the knowledge, use, recommendation, interpretation, or instruction in the use of any information sources other than those which describe the library; such as schedules, floor plans, handbooks, and policy statements. Examples of directional transactions include giving instruction in locating, within the library, staff, library users, or physical features, etc., and giving assistance of a nonbibliographic nature with machines.

PART G - ELECTRONIC SERVICES

This section requests information about the electronic services provided by the library. The questions require a "yes" or "no" response. If the answer was "yes" at any time during the academic year, respond "yes".

PART H – INFORMATION LITERACY

Information Literacy is the set of skills needed to find, retrieve, analyze, and use information. The questions require a "yes" or "no" response.
