The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in languages that are appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Acknowledgments

The information presented in this publication was provided by either state coordinators for the Integrated Postsecondary Education Data System (IPEDS) or officials at individual institutions. In addition, these persons provided assistance in resolving questions about the data which resulted in more accurate information. Although it is not possible to list the names of all these people, their assistance was invaluable and is much appreciated.

The Office for Civil Rights (OCR) and the National Center for Education Statistics (NCES), with the approval of the Office of Management and Budget, cooperate in the collection of racial-ethnic and gender information from all postsecondary institutions participating in the Fall Enrollment survey. In this collaboration, data provided by postsecondary institutions are designated as Compliance Reports pursuant to the Civil Rights Act of 1964 at 34 CFR 100.6(b).

The author is grateful to Dr. William B. Harvey, American Council on Education; Peter A. McCabe, Office for Civil Rights; and Susan G. Broyles, C. Dennis Carroll, Charlene M. Hoffman, Paula R. Knepper, Karen O'Connor, and John P. Sietsema of the National Center for Education Statistics for their valuable comments during the review of this publication.

Summary

This report presents data on student enrollment in postsecondary education institutions in the 50 states and the District of Columbia for fall 1998. The data are from the Integrated Postsecondary Education Data System (IPEDS) of the National Center for Education Statistics (NCES).

Enrollment data were collected through two IPEDS surveys. The “Fall Enrollment Survey” (IPEDS-EF:98) was sent to all institutions that award associate's or higher level degrees or postbaccalaureate or higher level certificates and that have a Title IV Program Participation Agreement (PPA) with the Department of Education. Postsecondary institutions that award only certificates or diplomas requiring less than 4 years to complete reported enrollment as part of their IPEDS “Consolidated Survey” (IPEDS-CN:98). Combining data from these two surveys provides a complete picture of enrollment in postsecondary education institutions in the 50 states, the District of Columbia, and the U.S. territories.

This report focuses on institutions that (1) have a PPA with the Department of Education and thus are eligible to participate in Title IV programs,¹ (2) grant associate's or higher level degrees, and (3) are within the 50 states and the District of Columbia. Of the 9,355 postsecondary institutions within the 50 states and the District of Columbia identified by IPEDS, a little less than half (4,455) are categorized as degree-granting institutions. Of these, 4,015, or 90.1 percent, are Title IV institutions and form the basis for this report. Title IV of the Higher Education Act of 1965 (as amended) establishes federal financial aid programs (e.g., Pell Grants and Stafford Loans) for students attending postsecondary institutions. Students attending institutions with a PPA may be eligible either to receive Title IV funds or to defer repayment of their loans.

Characteristics of Enrolled Students

In the fall of 1998, 14.9 million students were enrolled in the 6,333 Title IV postsecondary institutions in the 50 states and the District of Columbia. Of these, 97.2 percent were enrolled in degree-granting institutions. Over three-fourths of the 14.9 million students attended public institutions; of these students, 98.3 percent attended degree-granting institutions and 1.7 percent were enrolled in non-degree-granting institutions. Nearly 21 percent of students in Title IV degree-granting institutions were enrolled in private not-for-profit institutions and 2.5 percent attended private for-profit institutions. Of those students enrolled in non-degree-granting institutions, 45.2 percent were enrolled in private for-profit institutions (table A).

¹ In the remainder of this report, these are referred to as Title IV institutions.

Table A.—Total enrollment in Title IV postsecondary institutions, by degree-granting status, control and level of institution, and race/ethnicity of student: 50 states and District of Columbia, fall 1998

Control and level of institution, and race/ethnicity of student	All institutions		Degree-granting		Non-degree-granting	
	Number	Percent	Number	Percent	Number	Percent
All institutions	14,946,908	100.0	14,530,036	100.0	416,872	100.0

Hispanic	1,323,990	8.9	1,259,586	8.7	64,404	15.4
Asian/Pacific Islander	921,183	6.2	901,896	6.2	19,287	4.6
American Indian/Alaskan Native	151,699	1.0	144,554	1.0	7,145	1.7
Nonresident alien	447,000	3.0	443,604	3.1	3,396	0.8

† Not applicable. All less-than-2-year institutions are non-degree-granting.

NOTE: Detail may not add to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:98).

About 3 percent of students enrolled in Title IV degree-granting postsecondary institutions were nonresident aliens (individuals who are in the United States on temporary visas). Of the remainder, 70.2 percent were White, non-Hispanic; 10.9 percent were Black, non-Hispanic; 8.7 percent were Hispanic; 6.2 percent were Asian/Pacific Islander; and 1.0 percent were American Indian/Alaskan Native. With the exception of Asian/Pacific Islanders, minority² students represented a higher proportion of the enrollment at Title IV non-degree-granting institutions than at Title IV degree-granting institutions (table A).

A larger percentage of all students in Title IV degree-granting institutions were women (56.1 percent). Similarly, the majority of undergraduate (56.2 percent) and graduate (57.3 percent) students were women. However, women made up only 44.2 percent of first-professional students.³ Within each of the racial/ethnic groups, women composed the majority at all student levels except first-professional, with the exception of Blacks, where women were the majority at all levels (table B).

Overall, the majority of students (59.0 percent) were enrolled on a full-time basis. Compared to other racial/ethnic groups, Hispanics were generally more likely to be enrolled on a part-time basis, with nearly half (49.4 percent) of all Hispanic students attending school part time. However, there were some differences from this pattern at the graduate and first-professional levels. For example, at the graduate and first-professional levels, Hispanic students were more likely to enroll on a full-time basis than were Black or White students. Asian/Pacific Islanders were more likely to attend full time than any other racial/ethnic group at all student levels (table C).

Residence and Migration of First-Time, First-Year Undergraduate Students

The 1998 IPEDS “Fall Enrollment” survey also collected enrollment data by state of residence⁴ for all first-time, first-year undergraduate students, including those who had graduated from high school in the 12 months preceding the fall of 1998.

The percentage of first-time, first-year undergraduates who left their state of residence to attend a postsecondary institution varied considerably by state, ranging from a low of 6.3 percent for Mississippi to a high of 62.7 percent for the District of Columbia. Other states with 10 percent or less of their first-time, first-year students leaving the state were Alabama (9.4 percent), Arizona (7.8 percent), California (8.0 percent), Louisiana (9.2 percent), Michigan (9.7 percent), North Carolina (7.9 percent), Oklahoma (9.7 percent), Texas (8.3 percent), and Utah (7.9 percent). In addition to the District of Columbia, states that had 30 percent or more of their first-time, first-year undergraduates

² Nonresident aliens are not included as minority students, but are categorized separately.

³ First-professional students are those students enrolled in programs leading toward a first-professional degree in the fields of chiropractic, dentistry, law, medicine, optometry, osteopathy, pharmacy, podiatry, theology, and veterinary medicine.

⁴ A student’s state of residence is the state identified by the student as his/her permanent address at the time of application to the institution. This may be the legal residence of a parent or guardian, or the state in which the student has a driver’s license or is registered to vote. It is not necessarily the state in which the student’s high school is located.

Table B.—Percentage distribution of enrollment in Title IV degree-granting institutions, by race/ethnicity, student level, and gender: 50 states and District of Columbia, fall 1998

Student level	Gender	Total	White, non-Hispanic	Black, non-Hispanic	Hispanic	Asian/Pacific Islander	American Indian/ Alaskan Native	Nonresident alien
Total enrollment	Men	43.9	44.2	36.9	42.9	48.2	41.0	57.4

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:98).

leaving the state were Alaska (50.8 percent), Connecticut (44.6 percent), Maine (37.7 percent), New Hampshire (44.8 percent), New Jersey (36.7 percent), and Vermont (46.1 percent) (table D).

In addition to having the highest rate of out-migration, the District of Columbia also had the highest rate of in-migration, with 86.8 percent of all first-time, first-year undergraduates coming from other states. Two states reported that over half of their first-time, first-year students came from out of state: Rhode Island (55.4 percent) and Vermont (60.5 percent). Texas had the lowest percentage of first-time students from other states (9.2 percent), and two other states reported less than 10 percent from out-of-state: Illinois (9.5 percent) and Michigan (9.5 percent) (table D).

Changes in Enrollment Between 1997 and 1998

Between 1997 and 1998, enrollment in Title IV degree-granting institutions increased by 0.2 percent. While enrollment at public institutions decreased slightly (down 0.3 percent), enrollment at private for-profit institutions increased by nearly 11 percent. The number of women enrolled in these institutions increased at all student levels, while the number of men decreased somewhat at all levels. When examined by race/ethnicity, the overall increase in enrollments can be traced to a rise in minority enrollment, especially among Asian/Pacific Islanders and Hispanics, whose enrollments increased by 5.0 and 3.4 percent, respectively. During the same period, the number of nonresident aliens decreased by 4.6 percent and the enrollment of Whites dropped 0.7 percent, almost offsetting the rise in minority enrollments (table E).

There was a slight increase in enrollment at all student levels, with the biggest growth in numbers at the graduate level and the greatest percentage increase at the first-professional level. Undergraduate enrollment increased by only 0.1 percent, while first-professional enrollment rose 1.4 percent and graduate enrollment increased 0.8 percent. At the undergraduate level, the change patterns were similar to those at the total level for each group of students except nonresident aliens, whose undergraduate enrollment decreased by 10.0 percent. Although, the overall enrollment percentage increase at the first-professional level was greater than at any other student level, first-professional enrollment in private for-profit schools declined by almost 12 percent. At the graduate level, enrollment in private for-profit schools increased by 21.2 percent, a much higher increase than at the undergraduate and total levels (10.2 and 10.9 percent, respectively) (table E).

Table D.—In- and out-migration of all first-time students enrolled in Title IV degree-granting institutions, by state: 50 states and District of Columbia, fall 1998

State	Percent of enrollment due to in-migration	Percent of enrolled residents leaving state

¹ Minority enrollment is the sum of Black, non-Hispanic, Hispanic, Asian or Pacific Islander, and American Indian/Alaskan Native enrollment.

² Some of the change in enrollment in these states may be due to the determination that those U.S. Service Schools which are restricted to attendees who are already members of the armed forces were excluded from the scope of this report beginning in 1998.

³ Includes data for U.S. Service Schools.

Less than 0.05 percent.

¹ Minority enrollment is the sum of Black, non-Hispanic, Hispanic, Asian or Pacific Islander, and American Indian/Alaskan Native enrollment.

² Some of the change in enrollment in these states may be due to the determination that those U.S. Service Schools which are restricted to attendees who are already members of the armed forces were excluded from the scope of this report beginning in 1998.

³ Includes data for U.S. Service Schools.

Less than 0.05 percent.

Methodology

Overview

The 1998 Fall Enrollment (EF) survey was mailed to 4,730 postsecondary education institutions in the 50 states, District of Columbia, and the outlying areas. Enrollment is collected using three forms, depending on the highest level of enrollment at each institution. The “EF1” survey form was mailed to 2,876 4-year institutions including schools offering only certificates beyond the baccalaureate level; the “EF2” form, which is less detailed, was sent to 1,854 2-year institutions that grant an associate’s degree. For the 4,985 schools offering only certificates requiring less than four years to complete, enrollment is collected as part of the Consolidated (CN) survey¹. Enrollment data from all these forms were incorporated into the final enrollment file.

The data requested on each form or survey varies as follows:

Form Type	Level of Institution	Data Requested:
EF1	4-year institutions	Attendance status (full- or part-time) Student level (undergraduate, first-professional ² , graduate) Race/ethnicity and gender of student Degree-seeking status Major field of study Year of study Residence of first-time students
EF2	2-year degree-granting	Attendance status (full- or part-time) Race/ethnicity and gender of student Degree-seeking status Year of study Residence of first-time students
CN	All other institutions	Attendance status (full- or part-time) Race/ethnicity and gender of student Year of study

¹ The Consolidated survey uses a single form designed to collect information from certificate-granting institutions on fall enrollment, finance, fall staff, and completions in order to reduce respondent burden.

² First-professional students are those students enrolled in programs leading towards a first-professional degree in the fields of chiropractic, dentistry, law, medicine, optometry, osteopathy, pharmacy, podiatry, theology, and veterinary medicine.

Students **included** in the Fall Enrollment survey:

- students enrolled in courses creditable toward a degree or other formal award;
- students enrolled in courses that are part of a vocational or occupational program, including those enrolled in off-campus centers; and
- high school students taking regular college courses for credit.

Students **excluded** from the Fall Enrollment survey:

- students enrolled exclusively in courses not creditable toward a formal award and who were not in a postsecondary vocational program;
- students enrolled exclusively in remedial courses;
- students exclusively auditing classes;
- students studying abroad (e.g., at a foreign university) if their enrollment at the institution is only an administrative record and the fee is only nominal;
- students in any branch campus located in a foreign country; and
- students earning continuing education units (CEU's) only.

Universe, Institutions Surveyed and Response Rates

The IPEDS analysis universe is the subset of all postsecondary institutions that have Program Participation Agreements (PPA) with the Department of Education and thus may participate in Title IV federal financial aid programs. Beginning in 1996, this subset of institutions was validated by matching the IPEDS universe with the Postsecondary Education Participation System (PEPS) file which is maintained by the Office of Postsecondary Education (OPE). Beginning in 1998 those U.S. Service Schools which are restricted to attendees who are already members of the armed forces were determined to be outside the scope of the IPEDS analysis universe. This validation process determined that 9,715 institutions would receive either one of the Fall Enrollment or the Consolidated survey forms.

Survey forms were mailed in July 1998: (1) EF1 forms were mailed to 2,876 institutions; (2) EF2 forms to 1,854 institutions; and (3) CN surveys to 4,985 institutions. The survey results were collected from November 1998 through June 1999. During this time period institutions determined to be out-of-scope were deleted from the universe. These deletions resulted from formal notification by IPEDS state coordinators, validation against the PEPS file, and from followup telephone calls. Schools that had closed, did not offer postsecondary programs, or that were identified as duplicates on the file were deleted. At the conclusion of this process, 9,519

institutions represented the final 1998 fall enrollment universe. The final universe was also adjusted to reflect institutions that changed from one sector to another after universe file validation.

Table M-1 shows the number of institutions that were mailed one of the 1998 Fall Enrollment surveys (or the Consolidated form) by level and control of institution; the final in-scope universe of institutions receiving either survey form; and the number of in-scope institutions that responded.

On the Fall Enrollment and Consolidated survey files, institutions are identified as (1) degree-granting, i.e., those that offer either an associate's, bachelor's, master's, doctor's, or first-professional degree; or (2) non-degree-granting (certificate only), i.e., those institutions that offer only certificates at any postsecondary level.

Table M-2 provides the number of institutions and survey response rates by degree-granting status, the existence of a PPA, and by location and sector of institution. There are 6,474 participating institutions on the file; of these, 4,092 are degree-granting and 4,015 are in the 50 states and District of Columbia.

Table M-1.—Number of postsecondary institutions surveyed, by survey form and sector of institution: 50 states, District of Columbia, and the outlying areas, fall 1998

Survey form and sector of institution	Mailed	Final universe	Number responded
All postsecondary	9,715	9,519	6,999
Fall Enrollment (EF1)	2,876	2,855	2,522
Fall Enrollment (EF2)	1,854	1,823	1,709
Consolidated survey (CN)	4,985	4,841	2,768
4-year	2,876	2,878	2,546
Public	639	644	635
Private not-for-profit	2,002	1,987	1,703
Private for-profit	235	247	208
2-year	2,773	2,728	2,383
Public	1,277	1,260	1,197
Private not-for-profit	541	515	384
Private for-profit	955	953	802
Less-than-2-year	4,066	3,913	2,070
Public	363	355	299
Private not-for-profit	295	292	158
Private for-profit	3,408	3,266	1,613

NOTE: By definition, 4-year institutions offer a bachelor's degree or postbaccalaureate award of some kind; 2-year institutions offer at least one program of at least 2 years duration; and less-than-2-year schools offer only programs of less-than-2-years duration. The sector of the institution at the time of mailout (as of July 1998) may differ from its final sector (as of June 1999), due to a shift in the highest level of offering, or due to improper classification by sector the prior year.

* Not used for analysis purposes.

NOTE: Response rates were calculated as the ratio of the number of completed survey forms divided by the number of schools in the final universe; that is, the number mailed minus the number determined to be out-of-scope.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:98).

Survey Conduct and Editing

The 1998 Fall Enrollment survey was due November 15, 1998. Survey data were submitted via paper form, transmitted to NCES via the Internet, or submitted on diskette. Follow-up for survey non-response was conducted from November 1998 through April 1999.

- EF1/EF2: Initially, institutions received a blank survey form and a reminder letter encouraging them to complete and return their data. If the institution was a Title IV participant, a second followup letter was sent if needed. Subsequently, the contractor's Postsecondary Education Telephone System (PETS) was used to collect critical missing data from an institutional representative.
- CN: For these institutions, all followup was conducted via PETS.

All data, whether received on paper forms, diskettes, electronically via the Internet, or through the PETS system, went through the same editing process. Survey responses were edited for both internal and inter-year consistency. The following editing procedures were used for each survey part:

Part A: Enrollment by gender and race-ethnicity (Summary)

- Totals for men and women were checked by adding across racial-ethnic columns in each line. The generated gender totals were compared to the reported gender totals. If they differed but were within the allowable range³, the higher of the two totals was retained. The difference was either:
 - added to the appropriate "race/ethnicity unknown" column if the reported total was greater than the generated total (so that the generated total matched the reported total), or
 - added to the reported total if the reported total was less than the generated total (so that the reported total now matched the generated total).

In either case, the appropriate cell was flagged with the proper imputation code.

•All subtotals and totals were checked by adding down each column and comparing the generated totals with the reported (sub)totals. If a reported (sub)total differed from the generated total but was within the allowable range, the reported total was replaced by the generated total and the cell was flagged with the proper imputation code. If the difference exceeded the allowable range, institutions were contacted for verification/correction.

³This range was based on both the cell value and size of the difference for each data item.

- Comparisons were also made with the number of students reported for selected items for the prior year. If the differences were sufficiently large to trigger an edit flag, institutions were contacted for verification.

Part A: Enrollment by gender and race-ethnicity (Major field of study)

- Enrollment data for the same categories as the Part A summary were collected from 4-year institutions in 9 specified major fields of study. In addition to the edit checks performed for the summary data, the Classification of Instructional Program (CIP) codes, used to designate the field of study, were validated to insure only the codes being collected were reported. Also, the sum across all CIP records for an institution, by individual cell, had to be less than or equal to the corresponding cell in the summary record. Failure of either of these two additional edits required contacting the institution for correction.

Part B: Enrollment by age was not collected in 1998.

Part C: Enrollment of first-time freshmen by residence

- The sums for both numeric columns across all states were compared with the reported totals (line 99). Any differences were handled similarly to Part A, i.e., if the difference was within an allowable range, the reported total was replaced by the calculated sum and the appropriate imputation code was entered. Differences outside the allowable range were referred to the institution for correction. In addition, the reported total for total first-time first-year degree-seeking students in Part C (column 1) was compared with the corresponding data in Part A (Summary). If the sums differed but the difference was within an allowable range, the sum of Part A data replaced the reported total and the difference was then allocated among the state of residence lines using the state of residence distribution actually reported by the institution. As always, when these changes were made, the appropriate imputation code was entered. Differences that were outside the allowable range were referred to the institution for verification/correction.

Data Management and Imputation

Survey responses for non-responding Title-IV participating institutions were imputed when possible. Non-Title-IV participating institutions were not imputed. For Title-IV participating institutions, the following imputation procedures were used:

Part A: enrollment by race-ethnicity

- For institutions with reported data on the prior year enrollment file: Institutions that reported data in both 1997 and 1998 were grouped by level of offering and control of institution. Enrollment data were then aggregated for each group and percent changes were calculated. For each non-responding institution in 1998 that had responded in 1997, their 1997 enrollment data were adjusted by the corresponding percent changes for the group to which that institution belongs.
- For institutions with no prior year report: Imputations for institutions that had not responded the previous year were based on current year group means derived from similar institutions with reported data in 1998. Groups were formed by combining institutions with the same level and control.

Part C: enrollment of first-time freshmen by state of residency

- For institutions that did not report residence data in Part C in 1998, but reported data for first-time freshmen in Part A and reported residence (Part C) data in 1996: The edited total number of first-time freshmen reported in Part A (sum of line 1 + line 15, columns 15 + 16) was distributed throughout Part C in the same proportions as reported in 1996.
- For institutions that did not respond to either Parts A or C in 1998 but did respond to the 1997 fall enrollment survey: The total number of first-time freshmen in Part A were imputed as described above. If the institution reported Part C residence data in 1996, the imputed first-time freshmen enrollment in Part A was distributed in the same proportion as the reported 1996 data by state of residence.
- For institutions that did not report residence data in 1996: Imputations were not made for the entire Part C. Instead, the reported or imputed value of first-time first-year degree-seeking students from Part A was entered as the Part C total, and also in line 57 (“State unknown”). This was done to make Part C consistent, both internally and with Part A.

Redistribution of Racial/Ethnic Data

Beginning in 1990, a "race/ethnicity unknown" category was incorporated into the Fall Enrollment survey. For purposes of analysis of enrollment trends by race/ethnicity, enrollment reported in the "race/ethnicity unknown" category was redistributed across those columns that represent U.S. citizens, that is, columns 3 through 12; race/ethnicity unknown was not distributed to nonresident aliens. The value in "race/ethnicity unknown" was distributed in the same proportion as the racial/ethnic data for that gender and detail line. Note that this redistribution was done with imputed data as well as reported data. Table M-3 contains the enrollment totals and percentage of that total which was "race/ethnicity unknown".

Table M-3.—Number of postsecondary institutions, total enrollment, and percent reported or imputed as race/ethnicity unknown by Title IV participation, degree-granting status, and sector of institution: 50 states, District of Columbia, and the outlying areas, fall 1998

Degree-granting status and sector of institution	All institutions			Title IV participating			Not Title IV participating
