The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Acknowledgments

The collection and publication of a census of this magnitude has been a team effort. It would not have been accomplished without the support of the following individuals and organizations: the local public librarians who provided the data; the Federal-State Cooperative System (FSCS) State Data Coordinators; the Chief Officers of State Library Agencies (COSLA); the American Library Association (ALA); the National Commission on Libraries and Information Science (NCLIS); and the Institute of Museum and Library Services (IMLS).

This report was reviewed by Ruth Atchison, Sally Dillow, Thomas Nachazel, and Michael Regnier, Education Statistics Services Institute (ESSI); Anne Ricciuti, Institute of Education Sciences (IES); and Wilma Greene, Tai Phan, Lee Hoffman, Marilyn McMillen Seastrom, Tom Snyder, and Bruce Taylor, NCES. Their comments toward the improvement of the report are gratefully acknowledged.

The authors also extend their thanks to the FSCS Steering Committee members who led the effort during the time frame these data were collected and processed.

Carolyn Ashcraft, Arkansas State Library
Mary Chute, Office of Library Services, IMLS
Darla Cottrill, State Library of Ohio
Denise Davis, Oregon State Library
Liz Gibson, California State Library
Patience Frederiksen, Alaska State Library, Archives and Museums
Jane-Carol Heiser, IMLS

(Page is intentionally blank.)

Introduction

Survey Purpose and Data Items Included in This Report

The Public Libraries Survey (PLS) provides a national census of public libraries and their public service outlets. These data are useful to federal, state, and local policymakers; library and public policy researchers; and the public, journalists, and others.

This report provides summary information about public libraries in the 50 states and the District of Columbia for state fiscal year (FY) 2002. It covers service measures such as access to the Internet, number of users of electronic resources, other electronic services, number of Internet terminals used by staff only, number of Internet terminals used by the general public, reference transactions, public service hours, interlibrary loans, circulation, library visits, children's program attendance, and circulation of children's materials. It also includes information about size of collection, staffing, operating income and expenditures, type of geographic service area, type of legal basis, type of administrative structure, and number and type of public library service outlets. This report is based on the final data file.

The PLS is a universe survey. A total of 8,969 of the 9,141 public libraries responded to the FY 2002 survey (8,968 public libraries in the 50 states and the District of Columbia and 1 public library in the outlying areas, in the U.S. Virgin Islands), for a unit response rate of 98.1 percent. The FY 2002 survey is the 15th in the series.¹ The data were submitted using customized personal computer survey software furnished by NCES—see "Data Collection" in appendix C for more information.

Organization of This Report

This report includes the following major sections:

- Introduction
 - Survey Purpose and Data Items Included in This Report
 - Key Library Terminology
 - Types of Tables Included in This Report
 - Calculations Included in the Tables
 - Caveats for Using the Data
 - Data Items Collected but Omitted From This Report
 - History of the Public Libraries Survey and Cooperative Data Collection Today
- Findings from the FY 2002 data collection
- Tables (including 11 state ranking tables in appendix A)
- Technical Notes (appendix C)
- Glossary (appendix D)
- Survey Instrument (appendix E)

¹Trend data from some of the earlier surveys are discussed in *Public Library Trends Analysis, 1992–1996* (NCES 2001–324) (Glover 2001), an NCES Statistical Analysis Report.

Key Library Terminology

- **Public library.** A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following: (1) an organized collection of printed or other library materials, or a combination thereof; (2) paid staff; (3) an established schedule in which services of the staff are available to the public; (4) the facilities necessary to support such a collection, staff, and schedule; and (5) that is supported in whole or in part with public funds. (Note: In this report, the term public library means an administrative entity.)
- **Administrative entity.** An administrative entity is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one public library service outlet. The types of administrative structures for public libraries are reported in table 23.
- **Public library service outlet.** Public libraries can have one or more outlets that provide direct service to the public. The three types of public library service outlets included in this report are central library outlets, branch library outlets, and bookmobile outlets. Information on a fourth type of outlet, books-by-mail-only outlets, was collected but omitted from this report. See appendix D for definitions of these terms. Table 2 reports data concerning public library service outlets.

Types of Tables Included in This Report

There are 60 tables in this report: Tables 1 through 1B provide overview data, by state, about the number of public libraries and population of legal service area. Tables 2 through 24 are in sets of 2 each. The base table in each set (tables 2 through 24) displays data for the nation as a whole and for each of the 50 states, the District of Columbia, and 1 outlying area (the U.S. Virgin Islands, whose data are not included in the table totals). The “A” table in each set displays the same data by 11 ranges of population of legal service area. Appendix A includes 11 tables of state rankings.

Calculations Included in the Tables

Percentages rather than raw numbers are used in many of the tables to provide a clearer picture of data patterns. Percentage distributions may not sum to 100 due to rounding. To obtain a raw number from a percentage distribution table, multiply the percentage for the item by the total for the item (the total may be on a different table). For example, in table 9, the number of public libraries with fewer than 5,000 book and serial volumes is 338 ($9,137 \times .037$). The percentages are rounded, so multiplying a percentage by a total may not give an exact count for a desired category. Selected tables include *per capita* values for some items and *per 1,000 population*, *per 5,000 population*, or *per 25,000 population* values for others (e.g., table 4). Scales (per capita, per 1,000, etc.) were selected to provide the clearest display of differences across categories in the data.

Caveats for Using the Data

The data include imputations, at the unit and item levels, for nonresponding libraries. Comparisons to data prior to FY 92 should be made with caution, as earlier data do not include imputations for nonresponse, and the percentage of libraries responding to a given item varied widely among states.

State data comparisons should be made with caution because of differences in state fiscal year reporting periods (see “Reporting Period” in appendix C) and adherence to survey definitions.² The District of Columbia, while not a state, is included in this report. Special care should be used in comparing the District’s

²The definitions used by some states in collecting data from their public libraries may not be consistent with the PLS definitions. The 1994 NCES *Report on Coverage Evaluation in the Public Library Statistics Program* (NCES 94-430) and the 1995 NCES *Report on Evaluation of Definitions Used in the Public Library Statistics Program* (NCES 95-430) address issues of consistency in definitions among states. The reports are available on the NCES website at <http://nces.ed.gov/pubsearch/getpubcats.asp?sid=041#052>.

data to state data since it is an urban area, not a state. Caution should also be used in making comparisons with the state of Hawaii, as Hawaii reports only one public library for the entire state. See the section on “Imputation” in appendix C for a discussion of the imputation methodology.

Data Items Collected but Omitted From This Report

The items listed below are not included in this report but are on the data file. (Note: The data in the report are nationwide and state-level data; the data below are at the outlet level, or are the kind of data that cannot be aggregated, such as a web address.)

- Information on public library service outlets, including the location of public library service outlets relative to a metropolitan area, number of books-by-mail-only outlets, and number of bookmobiles by bookmobile outlet.
- Web address of the public library.
- Identifying information about individual public libraries and their outlets, such as address and telephone number.
- The public library’s status as a Federal State Cooperative System (FSCS) public library. (The survey includes the question, “*Does this public library meet all the criteria of the FSCS public library definition?*”)

History of the Public Libraries Survey and Cooperative Data Collection Today

History of the Public Libraries Survey

In 1985, the National Center for Education Statistics (NCES) and the American Library Association (ALA) conducted a pilot project in 15 states to assess the feasibility of a federal-state cooperative program for the collection of public library data. The project was jointly funded by NCES and the U.S. Department of Education’s former Library Programs (LP) office. In 1987, the project’s final report recommended the development of a nationwide data collection system. The Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (P.L. 100-297) charged NCES with developing a voluntary FSCS for the annual collection of public library data.³ To carry out this mandate, a task force was formed by NCES and the National Commission on Libraries and Information Science (NCLIS), and the FSCS was established in 1988.

The first E.D. TAB report in this series, *Public Libraries in 50 States and the District of Columbia: 1989*, which included data from 8,699 public libraries in 50 states and the District of Columbia, was released by NCES in 1991. A data file and survey report have been released annually since then. The states have always submitted their data electronically, via customized personal computer survey software furnished by NCES.

Cooperative Data Collection Today

The 1988 NCES-NCLIS task force evolved into the FSCS Steering Committee as we know it today. This committee is integral to the design and conduct of the survey. Its membership includes State Data Coordinators (SDCs) and representatives of the Chief Officers of State Library Agencies (COSLA), NCLIS, ALA, the Institute of Museum and Library Services (IMLS), the U.S. Census Bureau (the data collection agent), and NCES.

Data are collected through the PLS, conducted annually by NCES through the FSCS for Public Library Data. FSCS is a cooperative system through which states and the outlying areas submit data for each of 9,000 public libraries to NCES on a voluntary basis. At the state level, FSCS is administered by SDCs appointed by

³This was superseded by the National Education Statistics Act of 1994 (P.L. 103-382) and, more recently, by the Education Sciences Reform Act of 2002.

the COSLA. The SDC collects the requested data from public libraries and submits these data to NCES. NCES aggregates the data to provide the state and national totals presented in this report.

Findings

Number of Public Libraries and Population of Legal Service Area

- There were 9,137⁴ public libraries (administrative entities)⁵ in the 50 states and the District of Columbia in fiscal year (FY) 2002 (table 1).
- Public libraries served 98 percent⁶ of the total population of the states and the District of Columbia, either in legally established geographic service areas or in areas under contract.
- Eleven percent of the public libraries served 72 percent of the population of legally served areas in the United States; each of these public libraries had a legal service area population of 50,000 or more (derived from tables 1A and 1B).⁷

Service Outlets

- In FY 2002, 81 percent of public libraries had one single direct-service outlet (an outlet that provides service directly to the public) (table 23). Twenty percent had more than one direct-service outlet. Types of direct-service outlets include central library outlets, branch library outlets, and bookmobile outlets.
- A total of 1,535 public libraries (17 percent) had one or more branch library outlets, with a total of 7,500 branch outlets (table 2). The total number of central library outlets was 8,986. The total number of stationary outlets (central library outlets and branch library outlets) was 16,486. Eight percent of public libraries had one or more bookmobile outlets, with a total of 873 bookmobiles.

Legal Basis and Interlibrary Relationships

- In FY 2002, 54 percent of public libraries were part of a municipal government, 10 percent were part of a county/parish, 15 percent were nonprofit association libraries or agency libraries, 11 percent were separate government units known as library districts, 4 percent had multijurisdictional legal basis under an intergovernmental agreement, 3 percent were part of a school district, 1 percent were part of a city/county, and 1 percent reported their legal basis as “other” (table 21).⁸
- Seventy-six percent of public libraries were members of a system, federation, or cooperative service, while 23 percent were not (table 24). One percent served as the headquarters of a system, federation, or cooperative service.⁹

⁴Of the 9,137 public libraries, 7,358 were single-outlet libraries and 1,779 were multiple-outlet libraries.

⁵See the glossary (appendix D) for definitions of the terms used in this report.

⁶This percentage was derived by dividing the total unduplicated population of legal service areas for the 50 states and the District of Columbia by the sum of their official state total population estimates (table 1). (The percentage is based on unrounded data.) (Also see *Data File, Public Use: Public Libraries Survey: Fiscal Year 2002* [NCES 2004–327]).

⁷The sum of the five columns in table 1A where the population of the legal service area is 50,000 or more is 11.3 percent. The sum of the five columns in table 1B where the population of the legal service area is 50,000 or more is 71.9 percent. (The percentages are based on unrounded data.)

⁸Detail may not sum to totals because of rounding.

⁹Libraries that identify themselves as the headquarters of a system, federation, or cooperative service are not included in the count of members of a system, federation, or cooperative service.

Library Services

Children's Services

- Nationwide, circulation of children's materials was 682.9 million, or 36 percent of total circulation, in FY 2002 (table 5). Attendance at children's programs was 52.1 million.

Internet Access and Electronic Services

- Nationwide, 93 percent of public libraries provided access to electronic services¹⁰ (table 6).
- Nationwide, uses of electronic resources per year totaled 292.7 million, or 1.1 uses of electronic resources per capita (table 6).¹¹
- Nationwide, 97 percent of public libraries had access to the Internet (table 6).
- Internet terminals available for public use in public libraries nationwide numbered 141,000, or 2.5 per 5,000 population (table 7). The average number of Internet terminals available for public use per stationary outlet was 8.6.¹²
- Ninety-nine percent¹³ of the unduplicated population of legal service areas had access to the Internet through their local public library.

Other Services

- Total nationwide circulation of public library materials was 1.9 billion, or 6.8 materials circulated per capita (table 4). By state, the highest circulation per capita was 14.6, and the lowest was 2.1.
- Nationwide, 23.3 million library materials were loaned by public libraries to other libraries (table 4).
- Nationwide, reference transactions in public libraries totaled 301.8 million, or 1.1 reference transactions per capita (table 4).
- Nationwide, library visits to public libraries totaled 1.2 billion, or 4.5 library visits per capita (table 4).

¹⁰Access to electronic services refers to electronic services (e.g., bibliographic and full-text databases, multimedia products) provided by the library due to subscription, lease, license, or consortial membership or agreement. It includes full-text serial subscriptions and electronic databases received by the library or an organization associated with the library.

¹¹The number of users (not uses) per typical week (not per year) was reported on the survey. Survey respondents were instructed to count a user who uses the library's electronic resources three times a week as three users. In this finding, the data are presented on an annualized basis (by multiplying the weekly figures in table 6 by 52) for comparison with other annual data in the report; per capita values (instead of the per 1,000 population in table 6) are used due to the change in scale of the data; and "uses" was substituted for "users" for meaningful per capita comparisons as there cannot be more "users" than the population base.

¹²The average was calculated by dividing the total number of Internet terminals available for public use in central and branch outlets by the total number of such outlets. (See table 2 for outlet data.)

¹³This percentage was derived by summing the unduplicated population of legal service areas for all public libraries that provided public-use Internet terminals, and then dividing the total by the unduplicated population of legal service areas in the United States (table 1). (Also see *Data File, Public Use: Public Libraries Survey: Fiscal Year 2002* [NCES 2004-327]).

Collections

- Nationwide, public libraries had 785.1 million books and serial volumes in their collections, or 2.8 volumes per capita, in FY 2002 (table 8). By state, the number of volumes per capita ranged from 1.7 to 5.1.
- Public libraries nationwide had 35.7 million audio materials and 28.7 million video materials in their collections (table 8).
- Nationwide, public libraries provided 6.6 materials in electronic format per 1,000 population (e.g., CD-ROMs, magnetic tapes, and magnetic disks) (table 8).

Staff

- Public libraries had a total of 136,000 paid full-time-equivalent (FTE) staff in FY 2002, or 12.3 paid FTE staff per 25,000 population (tables 10 and A6). Of the total FTE staff, 22 percent, or 2.7 per 25,000 population, had master's degrees from programs of library and information studies accredited by the American Library Association ("ALA-MLS" degrees); 11 percent were librarians by title but did not have the ALA-MLS degree; and 67 percent were in other positions (tables 10 and A7).¹⁴
- Forty-six percent of all public libraries, or 4,211 libraries, had librarians with "ALA-MLS" degrees (table 10).

Operating Income and Expenditures

Operating Income

- In FY 2002, 79 percent of public libraries' total operating income of about \$8.6 billion came from local sources, 12 percent from state sources, 1 percent from federal sources, and 9 percent from other sources, such as monetary gifts and donations, interest, library fines, and fees (table 12).
- Nationwide, the average total per capita¹⁵ operating income for public libraries was \$30.97 (table 13). Of that, \$24.49 was from local sources, \$3.61 from state sources, \$.17 from federal sources, and \$2.69 from other sources.
- Per capita operating income from local sources was under \$3.00 for 9 percent of public libraries, \$3.00 to \$14.99 for 34 percent of libraries, \$15.00 to \$29.99 for 33 percent of libraries, and \$30.00 or more for 24 percent of libraries (table 14).¹⁶

Operating Expenditures

- Total operating expenditures for public libraries were \$8 billion in FY 2002 (table 15). Of this, 65 percent was expended for paid staff and 14 percent for the library collection.
- Thirty percent of public libraries had operating expenditures of less than \$50,000, 41 percent expended \$50,000 to \$399,999, and 29 percent expended \$400,000 or more (derived from table 18).
- Nationwide, the average per capita operating expenditure for public libraries was \$28.94 (table 16). By state, the highest average per capita operating expenditure was \$53.93, and the lowest was \$13.14.

¹⁴Detail may not sum to totals because of rounding.

¹⁵Per capita figures are based on the total unduplicated population of legal service areas (which excludes populations of unserved areas) in the 50 states and the District of Columbia, not on the state total population estimates.

¹⁶Percentages are based on unrounded data.

- Expenditures for library collection materials in electronic format¹⁷ were 1 percent of total operating expenditures for public libraries (table 17). Expenditures for electronic access¹⁸ were 3 percent of total operating expenditures.

¹⁷Operating expenditures for library materials in electronic format are defined as operating expenditures for materials considered part of the collection, whether purchased or leased, such as CD-ROMs, magnetic tapes, and magnetic disks that are designed to be processed by a computer or similar machine. Examples are U.S. Census data tapes, locally mounted databases, serials, and reference tools. Included are operating expenditures for equipment when the cost is inseparably bundled into the price of the information service product. Excluded are operating expenditures for library system software and microcomputer software used only by the library staff.

¹⁸Operating expenditures for electronic access are defined as operating expenditures from the library budget associated with access to electronic materials and services. (Not reflected is the considerable amount of money spent by state library agencies and library consortia to provide electronic access to local libraries.) Included are expenditures for the following: computer hardware and software used to support library operations, whether purchased or leased; mainframes and microcomputers; maintenance; and equipment used to run information service products when those expenditures can be separated from the price of the product. Expenditures for services provided by national, regional, and local bibliographic utilities, networks, consortia, and commercial services are reported, as well as all fees and usage costs associated with such services as Online Computer Library Center (OCLC), FirstSearch, or electronic document delivery.

How to Obtain Print and Electronic Products

Under its library surveys, NCES regularly publishes E.D. TABs, which consist of tables, usually presenting state and national totals, a survey description, and data highlights. NCES also publishes separate, more in-depth studies analyzing these data.

Internet Access

Many NCES publications (including out-of-print publications) and edited raw data files from the library surveys are available for viewing or downloading at no charge through the electronic catalog on the NCES website at <http://nces.ed.gov/pubsearch/>.

Ordering Print Products

Many NCES publications are also available in printed format. To order one free copy of this and other recent NCES reports, contact the Education Publications Center (ED Pubs) at <http://www.edpubs.org>.

E-mail: customerservice@edpubs.org
Toll-free phone: 1-877-4ED-PUBS (877-433-7827)
TTY/TDD: 1-877-576-7734
Fax: 1-301-470-1244
Mail: ED Pubs, P.O. Box 1398, Jessup, MD 20794-1398

If you need more than one copy of a publication or if ED Pubs supplies have been exhausted, more recent publications may be purchased from the Government Printing Office, Superintendent of Documents (GPO). Contact GPO Access (U.S. Government Online Bookstore) at <http://bookstore.gpo.gov/>.

Many of the publications listed are available through the Educational Resources Information Clearinghouse (ERIC) system. For further information on services and products, you may visit the EDRS website at <http://www.eric.ed.gov>.

Out-of-print publications and data files may be available through the NCES Electronic Catalog on NCES's website at <http://nces.ed.gov/pubsearch/> or through one of the 1,400 federal depository libraries throughout the United States at <http://www.gpoaccess.gov/libraries.html>. Use the NCES publication numbers included in the citations for publications and data files to quickly locate items in the NCES Electronic Catalog. Use the GPO number to locate items in federal depository libraries.

¹A state's total *population of legal service area* (defined in the glossary in appendix D) may be more than the official state population estimate because some public libraries have overlapping service areas.

²50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate for population of legal service area is the percentage of libraries that reported the item. The other population items are single state-reported figures. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹Total stationary outlets is the sum of central and branch libraries.

²50 States and DC totals exclude outlying areas.

³Of the 9,137 libraries in the 50 States and DC, 7,358 were single-outlet libraries and 1,779 were multiple-outlet libraries. Some single-outlet libraries are bookmobiles or books-by-mail only outlets. Multiple-outlet libraries may consist of branches only, bookmobiles only, or branches and bookmobiles only.

NOTE: Response rate is the percentage of libraries that reported the specific item. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹These data are derived from the total *public service hours per year* and the total outlets (*central, branch, bookmobile*) reported by public libraries. (See glossary in appendix D for definitions of these terms.)

²50 States and DC totals exclude outlying areas.

NOTE: Percentage distribution is based on libraries that reported public service hours. Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported public service hours. Item(s) with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

Rounds to zero.

¹Per capita and per 1,000 population are based on the total unduplicated population of legal service areas.

²50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹The average per stationary outlet was calculated by dividing the total number of public-use Internet terminals in central and branch outlets by the total number of such outlets. See table 2 for the number of service outlets.

²Per 5,000 population is based on the total unduplicated population of legal service areas.

³The average per outlet was calculated by dividing the total number of staff-use only Internet terminals by the total number of central, branch, and bookmobile outlets.

⁴The average per FTE (full-time equivalent) staff was calculated by dividing the total number of Internet terminals for staff use only by the total number of FTE staff. Total FTE staff are in table 10. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs).

⁵50 States and DC totals exclude outlying areas.

NOTE: Response rate is the percentage of libraries that reported the specific item. Item(s) with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System (FSCS) for Public Library Data, Public Libraries Survey, Fiscal Year 2002.

(Page is intentionally blank.)

Table 7A. Number of Internet terminals in public libraries, by type of use and by population of legal service area: 50 states and the District of Columbia, fiscal year 2002

Population of legal service area	Number of public libraries	Number of Internet terminals						
		Total	Public use			Staff use only		
			Total	Average per stationary outlet ¹	Per 5,000 population ²	Total	Average per outlet ³	Average per paid FTE staff ⁴

Rounds to zero.

¹Physical units such as CD-ROMs, magnetic tapes, and magnetic disks that are designed to be processed by a computer.

²Per capita and per 1,000 population are based on the total unduplicated population of legal service areas.

³50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹ALA-MLS: A master's degree from a graduate library education program accredited by the American Library Association (ALA). Librarians with ALA-MLS are also included in total librarians.

²50 States and DC totals exclude outlying areas.

³New Jersey collects data on the number of "certified" librarians, not "ALA-MLS" librarians (i.e., the state does not distinguish between master's degrees from programs of library and information studies accredited by the American Library Association (ALA) and all other master's degrees in library science awarded by institutions of higher education). Their "certified" librarians total is included in the ALA-MLS column. Nationally, 4,727 master's degrees in library science were awarded by institutions of higher education in 2000–01 (U.S. Department of Education, NCES, Digest of Education Statistics, 2002, table 253.) Master's degrees from ALA-accredited programs totalled 4,109 and accounted for 87 percent of total master's degrees awarded in 2000–01 (ALA, Office for Human Resource Development and Recruitment, Degrees and Certificates Awarded by U.S. Library and Information Studies Education Programs, 2003.)

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported the specific item. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

Rounds to zero.

¹Income is referred to as revenue in other NCES fiscal surveys.

²This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.

³This includes monetary gifts and donations received in the current year, interest, library fines, and fees for library services.

⁴50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported total income and/or all four sources of income. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

Rounds to zero.

¹Per capita is based on the total unduplicated population of legal service areas. Per capita operating income by source may not sum to total due to rounding. Income is referred to as revenue in other NCES fiscal surveys.

²50 States and DC totals exclude outlying areas.

³Hawaii did not receive any operating income from local sources.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹Per capita is based on the total unduplicated population of legal service areas. Income is referred to as revenue in other NCES fiscal surveys.

²50 States and DC totals exclude outlying areas.

³Hawaii did not receive any operating income from local sources.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries for which local income and a nonzero value for population of legal service area were reported. Item(s) with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹Per capita is based on the total unduplicated population of legal service areas.

²This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs incurred in the operation and maintenance of physical facilities.

³50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

Outlying areas									
Virgin Islands	1	0	100.0	100.0	0	0	0	0	0

¹50 States and DC totals exclude outlying areas

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported capital outlay. Item(s) with response rates below 100 percent include imputations for nonresponse. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

¹Type of legal basis refers to the type of local government structure within which the library functions. See the glossary in appendix D for full definitions of the types listed in this table.

²Multijurisdictional—The public library is operated jointly by two or more units of local government under an intergovernmental agreement.

³Nonprofit association or agency libraries—The public library is privately controlled but meets the statutory definition of a public library in a given state.

⁴School district—The public library is under the legal basis of a school district.

⁵Library district—A district, authority, board or commission authorized by state law to provide library services.

⁶Other—Includes libraries under the legal bases of Native American Tribal Government and combined public/school libraries.

⁷50 States and DC totals exclude outlying areas.

NOTE: Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported type of legal basis. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

Outlying Areas													
Virgin Islands	1	0	0	0	0	0	0	0	0	0	0	100.0	100.0

¹50 States and DC totals exclude outlying areas.

NOTE: The types of geographic service area (City, County, Metropolitan Service Area, etc.) are from U.S. Census geography. Public libraries identified the geographic service area type that either exactly or most nearly described the geographic area for which the public library was established to offer services and from which (or on behalf of which) the library derives income, and any areas under contract for which the library is the primary service provider. Detail may not sum to totals because of rounding. Response rate is the percentage of libraries that reported geographic service area. Data were not reported by the following outlying areas: American Samoa, Guam, Northern Marianas, Palau, and Puerto Rico.

NOTE: If a state's total *population of legal service area* exceeds its *total unduplicated population of legal service areas* (defined in the glossary in appendix D), the state has overlapping service areas. These data are included in table 1.

(Page is intentionally blank.)

Appendix C—Technical Notes

Reporting Period

The FY 2002 PLS requested data for state fiscal year 2002. In some states, the fiscal year reporting period varies among localities—these states were requested to report the earliest starting date and latest ending date reported by their public libraries. Although the reporting period spans more than a 12-month period for such states (listed in “Other” column in table below) due to multiple fiscal cycles, each public library provided data for a 12-month period.

States by Reporting Period

07/01 to 06/02		01/02 to 12/02		Other
AK	MO	AR		12/00 to 09/02: MI
AZ	MT	CO		01/01 to 06/02: VT

*VI—Virgin Islands

Definitions

The survey definitions are included in the Glossary in appendix D. A few key items are discussed below.

Library visits and reference transactions. Public libraries reported annual library visits and annual reference transactions based on actual counts, if available. Otherwise, annual estimates were provided based on a typical week in October, multiplied by 52. See the definitions of these items in appendix D for more information.

Population of legal service area. The PLS has three population items: (1) Population of Legal Service Area for each public library, (2) Total Unduplicated Population of Legal Service Areas in the state that receive public library services, and (3) Official State Total Population Estimate. The data for all population items are provided by the state library agency. There are significant methodological differences in the ways states calculate the first two items, and the time periods for these counts varies among states. Table 1 provides the total Population of Legal Service Area and the Total Unduplicated Population of Legal Service Areas for each state.¹

¹The Total Unduplicated Population of Legal Service Areas provided by the states does not include unserved areas and may vary from data provided by sources using standard methodology (e.g., U.S. Census Bureau).

Appendix C—Technical Notes—Continued

The total Population of Legal Service Area for all public libraries in a state may exceed the state's Total Unduplicated Population of Legal Service Areas or the Official State Total Population Estimate. This occurs when the state has one or more geographically adjacent libraries (for example, a county library and a city library within the county) that serve, and therefore count, the same population. Twenty-two states had such overlapping service areas in FY 2002. (See appendix B for a list of these states.)

To enable meaningful state comparisons using total Population of Legal Service Area data (for example, the number of books/serial volumes per capita), the Population of Legal Service Area data were adjusted to eliminate duplicative reporting due to overlapping service areas. The public library data file has a derived unduplicated population of legal service area for *each library* for this purpose (the variable is called POPU_UND). This value was prorated for each library by calculating the ratio of a library's Population of Legal Service Area to the state's total Population of Legal Service Area and applying the ratio to the state's Total Unduplicated Population of Legal Service Areas.

Paid Staff (Full-Time Equivalent)

Paid staff were reported in full-time equivalents (FTEs) (tables 10 through 11A). To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places (rounded to one decimal place in the tables).

Survey Universe

The survey frame includes 9,141 public libraries (9,137 public libraries in the 50 states and the District of Columbia and four public libraries in the outlying areas of Guam, the Northern Mariana Islands, Palau, and the U.S. Virgin Islands). The public libraries were identified by the state library agencies.² Although data were not systematically collected from public libraries on Native American reservations, a total of 39 such libraries were reported in FY 2002. The survey population does not include military libraries that provide public library services or libraries that serve the residents of institutions. The FY 2002 survey is the 15th in the series. This report is based on the final data file.

Survey Response

Unit response. A total of 8,969 of the 9,141 public libraries in the survey frame responded to the FY 2002 PLS (8,968 public libraries in the 50 states and the District of Columbia and 1 in the outlying areas), for a unit response rate of 98.1 percent. Respondents to the survey are defined as public libraries for which the following data were reported: population of the legal service area and at least three of the five following items: total paid employees, total operating income, total operating expenditures, book/serial volumes, and total circulation.

Total response. The base for calculating response rates for specific items is the total number of libraries in the survey frame, including unit nonrespondents. For national totals, total response rates did not fall below 85 percent for any items in this report.³ For state totals, total response rates fell below 85 percent in 25 states and the District of Columbia for one or more items. (Note: The total response rates are included in the tables in this report.) Missing data for the 50 states and the District of Columbia were imputed and included in the

²Public libraries in two outlying areas, American Samoa and Puerto Rico, are not included in the survey frame because their state library agencies have never responded to NCES's request for participation in the survey. Their public libraries have not been identified and cannot be included in the survey frame or response rate calculations.

³The NCES Statistical Standards stipulate that if the item response rate is below 85 percent for any items used in a report, a nonresponse bias analysis is required for each of those items.

Appendix C—Technical Notes—Continued

state and national totals. Missing data were not imputed for nonresponding outlying areas. See *Imputation* section below for a discussion of the imputation methodology.

Data Collection

The FY 2002 PLS was released to the states over the Internet on November 15, 2002.⁴ States were placed into one of three reporting groups (with survey due dates of April 15, July 31, or August 29, 2003), based on their fiscal cycles or claim of extraordinary reporting hardship. States reported their data using personal computer data collection software called WinPLUS (Windows Public Library Universe System) which they downloaded from the Internet. WinPLUS was developed for NCES by the U.S. Census Bureau (the data collection agent). Edit follow-up was completed in mid-December of 2003. The editing process is described below.

Editing

State level. The survey software has an edit check program that generates on-screen warnings during the data entry/import process, enabling the respondent to review the data and correct many errors immediately. Following data entry/import, the respondent generates an on-screen or printed edit report for further review and correction of the data before submitting the final file to NCES. Four types of edit checks were performed:

1. *Relational edit checks.* This is a data consistency check between related data elements. For example, an edit message is generated if the number of ALA-MLS Librarians is greater than Total Librarians.
2. *Out-of-range edit checks.* This is a comparison of the data reported for an item to the "acceptable range" of numeric values for the item. For example, an edit message is generated if average Public Service Hours per outlet per week is less than 10, or if the past year to current year change in Children's Circulation is greater than $\pm 5,000$ and greater than -30% to +50%.
3. *Arithmetic edit checks.* This is an arithmetic check comparing a reported total to the sum of its parts. For example, an edit message is generated if Total Operating Income is not equal to the sum of its parts (Local Government Income, State Government Income, Federal Government Income, and Other Income).
4. *Blank, zero, or invalid data edit checks.* This is a check of reported data against acceptable values. For example, an edit message is generated if Book/Serial Volumes is 0 or blank.

The WinPLUS software generates state summary tables (corresponding to the tables in this report but limited to a respondent's data) and single-library tables (showing data for individual public libraries in their state). Respondents were encouraged to review the tables for data quality issues before submitting their data to NCES. State data submissions included a signed form from the Chief Officer of the State Library Agency certifying the accuracy of the data.

National level. The U.S. Census Bureau and NCES reviewed and edited the state data submissions, working closely with the state data coordinators and the FSCS Steering Committee.

Imputation

All libraries, including nonresponding libraries, were sorted into imputation cells based on the region and size of population served. Imputations for nonresponding libraries were performed using the data calculated from their imputation cells. Item imputation was performed on each record with nonresponse variables. The data are identified as either imputed (estimated) or reported (actual) on the survey data file through the use of imputation codes. For more information, see *Data File, Public Use: Public Libraries Survey: Fiscal Year 2002* (NCES 2004-327) on the NCES web site.

⁴The survey instrument is included in appendix E of this report.

Appendix C—Technical Notes—Continued

The following imputation rules were applied:

- A. For libraries that responded in 2001 but not 2002 (or in 2000 but not in 2001 or 2002):
 - A1. The growth rates were calculated for institutions that reported in both 2001 and 2002 (or in both 2000 and 2002). The mean (average) growth rate was calculated for each imputation cell.
 - A2. The average changes computed in step A1 were applied to the 2001 data (or 2000 data) of 2002 nonresponding libraries to obtain an estimate for 2002.

This “growth rate” method was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, total paid employees, book/serial volumes, subscriptions, audio, public service hours, library visits, reference transactions, total circulation, salaries, total staff expenditures, total collection expenditures, other operating expenditures, and total expenditures.
 - A3. Employee benefits were derived by subtracting salaries from the estimated total staff expenditures determined in step A2.
 - A4. Total operating expenditures were derived by summing total staff expenditures, total collection expenditures, and other operating expenditures estimated in step A2.
 - A5. For income variables (i.e., total income and income from federal, state, and local government sources) both responding and nonresponding libraries in an imputation cell were arranged in decreasing order of size of population served. A nonresponding library’s 2001 (or 2000) data were pulled forward, and a growth rate was determined by calculating the growth of the next smallest library to the nonresponding library that had data for both 2002 and 2001 (or 2002 and 2000). This growth rate was applied to the nonresponding library’s 2001 (or 2000) data to obtain an estimate for 2002. If no prior year growth rate was available for the next smallest library, the growth rate was assumed to be 1.00.
 - A6. Other income was derived by subtracting income from federal, state, and local sources from total income. Other paid employees was derived by subtracting librarians from total paid employees.
 - A7. Children’s program attendance was estimated by multiplying the current-year total library visits by the prior-year ratio of children’s program attendance to total library visits.
 - A8. Children’s circulation was estimated by multiplying the current-year total circulation by the prior-year ratio of children’s circulation to total circulation.
 - A9. Materials in electronic format was set to zero if materials in electronic format expenditures equals zero or Internet Access equals “No”.
 - A10. For materials in electronic format and materials in electronic format expenditures, if only one of these variables needed imputation and if 2001 or 2000 reported data were greater than zero for both variables, the reported variable was multiplied by the ratio or inverse ratio to obtain an estimate for 2002. If the ratio/inverse ratio cannot be used but there was 2001 or 2000 reported data then that data were multiplied by the appropriate growth rate to obtain an estimate for 2002.
 - A11. If the value for materials in electronic format was imputed to be zero or the sum of other operating expenditures and total collection expenditures equals zero and the value for materials in electronic format expenditures needs imputing, it was set to zero.
 - A12. For electronic access expenditures, if access to electronic services was “No” and access to the Internet was “No”, and the sum of other operating expenditures plus total collection expenditures

Appendix C—Technical Notes—Continued

was zero, then electronic access expenditures' imputed value was zero. Otherwise, the current year sum of other operating expenditures times the prior year ratio of electronic access expenditures to the prior year sum of other operating expenditures plus total collection expenditures was the imputed value. If only electronic access expenditures was reported in the prior year (2001 or 2000), then it was multiplied by the appropriate growth rate to obtain an estimate for 2002.

- A13. Access to electronic services and access to the Internet were imputed based on the prior-year response of "Yes" or "No".
- A14. For Internet terminals used by the general public and Internet terminals used by staff only; if Internet access equals "No", they were set to zero.
- A15. For Internet terminals used by the general public; if the number of outlets equals zero, it was set to zero.
- A16. For Internet terminals used by the general public and Internet terminals used by staff only, if there was 2001 or 2000 reported data, the data were carried forward as an estimate for 2002.
- A17. For population variables, the prior year data were carried forward in the current year.
- A18. Electronic Users was estimated by multiplying the current-year Internet terminals used by the general public by the prior-year (2001 or 2000) ratio of electronic users to Internet terminals used by the general public.
- B. For libraries with no reported data in 2000, 2001, or 2002:
- B1. The "growth rate" method (described in steps A1 and A2) was used to impute for 2002 if the prior year data (2001 or 2000) were imputed using prior year reported data and the imputed value was greater than zero.
- This method was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, total paid employees, book/serial volumes, subscriptions, audio, public service hours, reference transactions, circulation, total income, income from federal, state, and local sources, salaries, total staff expenditures, total collection expenditures, other operating expenditures, library materials in electronic format, operating expenditures for library materials in electronic format, and operating expenditures for electronic access.
- B2. The mean of the imputation cell was calculated for all libraries that responded in 2002. The cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.
- This method was used for imputing centrals, branches, bookmobiles, ALA-MLS librarians, total librarians, total paid employees, book/serial volumes, subscriptions, audio, public service hours, reference transactions, circulation, total income, income from federal, state, and local sources, salaries, total staff expenditures, total collection expenditures, other operating expenditures, library materials in electronic format, operating expenditures for library materials in electronic format, and operating expenditures for electronic access.
- B3. To impute total library visits when the prior year imputed data were not based on reported data, library visits was summed over all responding libraries in an imputation cell, as was the population served. The ratio of total library visits to total population served was multiplied by the nonrespondent's population value to estimate the nonrespondent's library visits.

Appendix C—Technical Notes—Continued

- B4. Children's program attendance was estimated using the method described in step B3 where the ratio of total children's program attendance to total library visits for the responding libraries in an imputation cell was multiplied by the nonrespondent's current-year library visits.
 - B5. Children's circulation was estimated by calculating the ratio of children's circulation to total circulation for the responding libraries in an imputation cell and multiplying the ratio by the current-year total circulation of the nonresponding library.
 - B6. Employee benefits were derived by subtracting salaries from the estimated total staff expenditures determined in step B1 (or step B2). Other income was derived by subtracting income from federal, state, and local sources from total income. Other paid employees was derived by subtracting librarians from total paid employees.
 - B7. Total operating expenditures were derived by summing total collection expenditures, total staff expenditures, and other operating expenditures estimated in step B1 (or step B2).
 - B8. Access to electronic services and access to the Internet were imputed based on the current-year response to operating expenditures for electronic access. (The value was set to "Yes" if electronic access expenditures or materials in electronic format expenditures was greater than 0; otherwise, the value was set to "No".)
 - B9. The median of the imputation cell was calculated for all libraries that responded in 2002. The cell median was not adjusted. This method was used for imputing Internet terminals used by the general public, Internet terminals used by staff only, and electronic users when there was no reported prior year (2001 or 2000) data. If the cell median was zero but based on the value of other electronic data items it was determined that the value should be greater than zero then the imputed value was equal to the unadjusted cell mean.
- C. For all nonresponding libraries:
- C1. Capital outlay was derived by imputing total expenditures (a derived variable which is the sum of total collections expenditures, total staff expenditures, other operating expenditures, and capital outlay) and subtracting total operating expenditures in order to get capital outlay. If the derived capital outlay had a negative value, it was changed to zero, total operating expenditures were changed to equal total expenditures, and total collection expenditures, total staff expenditures, and other operating expenditures were adjusted so that the sum would equal total operating expenditures. Alternatively, the cell mean (adjusted for population size) was used.
 - C2. The mean of the imputation cell was used to estimate videos and interlibrary loans. The cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

Appendix D—Glossary

Except where indicated with an asterisk (), the following definitions of terms are exactly as they appear in the survey instruction manual.*

Access to electronic services. See Electronic access.

Access to the Internet. See Internet access.

Administrative entity. This is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The Administrative Entity may have a single outlet, or it may have more than one outlet.

Administrative entity with a single direct service outlet. An Administrative Entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

Administrative entity with multiple direct service outlets where administrative offices are not separate. An Administrative Entity that serves the public directly with two or more service outlets, including some combination of a central library(ies), branch(es), bookmobile(s), and/or books-by-mail only.

Administrative entity with multiple direct service outlets where administrative offices are separate. An Administrative Entity that serves the public directly with two or more service outlets, including some combination of central library(ies), branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

Administrative structure. The Administrative Structure identifies an autonomous library entity that has its own governance and funding.

ALA-MLS. Librarians with master's degrees from programs of library and information studies accredited by the American Library Association.

Attendance. See Library visits.

Audio. These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically or electronically, or both. Included are records, audiocassettes, audio cartridges, audio-discs, audio-reels, talking books, and other sound recordings. See also Library collection.

Bookmobile(s). A bookmobile is a traveling branch library. It consists of at least all of the following: 1) a truck or van that carries an organized collection of library materials; 2) paid staff; and 3) regularly scheduled hours (bookmobile stops) for being open to the public.

Note: Count the number of vehicles in use, not the number of stops the vehicle makes.

Bookmobiles by bookmobile outlet. The number of bookmobiles in the bookmobile outlet record.

Note: A bookmobile outlet record may include one or more bookmobiles.

Books-by-mail only. A direct mail order service which provides books and other library materials. Books-by-mail typically serves rural residents, the disabled, the homebound, and others without access to another type of public library outlet. Requests for materials are usually received by mail and by telephone only. Only books-by-mail services that are housed separately from any other type of direct public service outlet (that is, central library, branches, or bookmobiles) should be coded here.

Appendix D—Glossary—Continued

Book/serial volumes. Books are non-periodical printed publications bound in hard or soft covers, or in loose-leaf format. Serials are publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals (magazines), newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume. See also Library collection.

Branch library. A branch library is an auxiliary unit of an Administrative Entity which has at least all of the following: 1) separate quarters; 2) an organized collection of library materials; 3) paid staff; and 4) regularly scheduled hours for being open to the public.

Capital outlay. These are funds for the acquisition of or additions to fixed assets such as building sites, new buildings and building additions, new equipment, initial book stock, furnishings for new or expanded buildings, and new vehicles. This excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.

Note: Local accounting practices shall determine whether a specific item is a capital expense or an operating expense regardless of the examples in the definition.

Central city. The largest central city and, in some cases, up to two additional central cities are included in the title of the Metropolitan Area; there also are central cities that are not included in a Metropolitan Area title. A Metropolitan Area central city does not include any part of that city that extends outside the Metropolitan Area boundary.

Central library. This is one type of single outlet library or the library which is the operational center of a multiple-outlet library. Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

*Note: Each Administrative Entity may report either no central library or one central library. No Administrative Entity may report more than one central library. Where two or more libraries are considered "centrals" for state or local purposes, one central and one or more branch libraries should be reported to FSCS. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library for FSCS purposes, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.

Children's program attendance. The count of the audience at all programs for which the primary audience is children. Includes adults who attend programs intended primarily for children.

Note: *Output Measures for Public Library Service to Children: A Manual of Standardized Procedures* (ALA, 1992) defines children as persons age 14 and under.

Circulation. See Total circulation.

Circulation of children's materials. The total annual circulation of all children's materials in all formats to all users. It includes renewals.

City/county. A multi-jurisdictional entity that is operated jointly by a county and a city.

Collection expenditures. This includes all expenditures for materials purchased or leased for use by the public. It includes print materials, microforms, machine-readable materials, audiovisual materials, etc. See also Operating expenditures.

Appendix D—Glossary—Continued

County/parish. An organized local government authorized in a state's constitution and statutes and established to provide general government.

Current serial subscriptions. See Subscriptions.

Direct service outlet. See Public library service outlets.

***Electronic access.** These are electronic services provided (e.g., bibliographic and full-text databases, multimedia products) due to subscription, lease, license, consortial membership or agreement. Include full-text serial subscriptions and electronic databases received by the library or an organization associated with the library.

The respondent answers Yes, No, or Missing (unknown, not reported) to the question "Does your library provide access to electronic services?"

Electronic access operating expenditures. See Operating expenditures for electronic access.

Electronic format materials. See Library materials in electronic format.

Employee benefits. These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts for direct paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection, unemployment compensation, workmen's compensation, tuition, and housing benefits. See also Operating expenditures.

Expenditures (Operating). See Operating expenditures.

Federal government operating income. This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the state. See also Operating income.

***Federal-State Cooperative System (FSCS) for Public Library Data.** FSCS is a cooperative system through which states, the District of Columbia, and the outlying areas submit individual public library data to NCES on a voluntary basis.

FSCS public library. See Public library (FSCS definition).

Full time equivalent (FTE) staff. See Paid staff (full-time equivalent)

Geographic service area. Choose from among the following types of readily available Census geography, one code that either exactly or most nearly describes the geographic area for which the public library has been established to offer services and from which (or on behalf of which) the library derives income and any areas served under contract for which the library is the primary service provider:

Note: The Population of Legal Service Area should be reflected in the geographic code selected.

- City (exactly)
- City (most nearly)
- County (exactly)
- County (most nearly)
- Metropolitan Area (exactly)
- Metropolitan Area (most nearly)
- Multi-County (exactly)

Appendix D—Glossary—Continued

Multi-County (most nearly)
School District (exactly)
School District (most nearly)
Other

Headquarters of a system, federation, or cooperative service. The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the system, federation, or cooperative service.

Note: Agencies that serve other libraries rather than the public should not be reported to FSCS.

Income. See Total operating income.

Interlibrary loans provided to. These are library materials, or copies of the materials, provided by one library to another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

Interlibrary loans received from. These are library materials, or copies of the materials, received by one library from another library upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

***Interlibrary relationship.** The interlibrary relationship identifies an Administrative Entity's relationship to a system, federation, or cooperative service.

***Internet access.** The Internet is the collection of networks that connects government, university, and commercial agencies (e.g., NSFNET, WestNet, etc.) and is unified by the use of a single protocol suite, TC/IP.

Report the library as providing Internet access only if one or more of the following services are accessible: telnet, gopher, file transfer protocol, or community network. Do not report a library that has access to electronic mail only.

Internet terminals used by general public. Number of computer terminals ('PC, 'dumb terminal', etc.) used by the general public in the library that are used to connect to the Internet (text only, graphical, etc.).

Internet terminals used by staff only. Number of computer terminals (PC, 'dumb terminal', etc.) used by staff only in the library that are used to connect to the Internet (text only, graphical, etc.).

Legal basis. The legal basis is the type of local government structure within which the entity functions. It reflects the state or local law which authorizes the library.

Legal service area population. See Population of the legal service area.

Librarians. Persons with the title of librarian who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS.

Library collection. Report physical units (for book/serial volumes, audio, video, subscriptions, and library materials in electronic format). For smaller libraries when volume data are not available, title information may be substituted. Items which are packaged together as a unit, (e.g., two compact discs or two video cassettes) and are generally checked out as a unit, should be counted as one physical unit.

Library district. This is a district, authority, board or commission authorized by state law to provide library services.

Appendix D—Glossary—Continued

Library materials. See Library collection.

Library materials in electronic format. The number of physical units such as CD-ROMs, diskettes, etc., that are designed to be processed by a computer. Examples are government documents, reference tools or serials distributed on CD-ROM or other portable digital carrier, locally mounted databases, diskettes or magnetic tapes. Exclude bibliographic records used to manage the collection, library system software, and microcomputer software used only by the library staff. See also Library collection.

Library visits. This is the total number of persons entering the library for whatever purpose during the year.

Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52. A “typical week” is a time that is neither unusually busy nor unusually slow.

Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

Local government operating income. This includes all tax and non-tax receipts designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, fines, or fees. See also Operating income.

Materials in electronic format. See Library materials in electronic format.

***Member of a system, federation, or cooperative service, but not the headquarters.** An autonomous library joined by formal or informal agreement(s) with other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc. This does include libraries that are part of national, multi-state or statewide library systems, federations, or cooperative services. This does not include multiple outlet administrative entities (e.g., libraries with branches that have the word “system” in their legal name) if the entity does not have an agreement with another autonomous library.

Note: For the purposes of this classification, networks, such as OCLC (Online Computer Library Center) and Internet are not considered systems, federations, or cooperative services.

Metropolitan area. A large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some Metropolitan Areas are defined around two or more nuclei. Each Metropolitan Area must contain a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total Metropolitan Area population of at least 100,000 (75,000 in New England). A Metropolitan Area comprises one or more central counties. (Independent cities are considered county equivalents.) A Metropolitan Area may also include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, Metropolitan Areas are composed of cities and towns rather than whole counties.

Multi-jurisdictional. An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.

Note: Please put city/county combinations under city/county, rather than under multi-jurisdictional.

Multiple direct service outlets where administrative offices are not separate. See Administrative entity with multiple direct service outlets where administrative offices are not separate.

Appendix D—Glossary—Continued

Multiple direct service outlets where administrative offices are separate. See Administrative entity with multiple direct service outlets where administrative offices are separate.

Municipal government (city, town or village). A municipal government is an organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

Native American tribal government. An organized local government authorized and established to provide general government to residents of a Native American reservation.

Note: Include Native Alaskan villages in this category.

Non-profit association or agency libraries. An entity privately controlled but meeting the statutory definition of a public library in a given state; includes association libraries.

Official state total population estimate. This is the most recent official total population figure for your state that matches the local population figures that you are submitting to NCES. The State Data Coordinator should obtain this figure annually from the State Data Center or other official state sources.

Operating expenditures. Operating expenditures are the current and recurrent costs necessary to support the provision of library services. Significant costs, especially benefits and salaries, that are paid by other taxing agencies (government agencies with the authority to levy taxes) "on behalf of" the library may be included if the information is available to the reporting agency. Only such funds that are supported by expenditure documents (such as invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Estimated costs are not reported. See also Total operating expenditures.

Operating expenditures for electronic access. Operating expenditures from the library budget associated with access to electronic materials and services. Include computer hardware and software used to support library operations, whether purchased or leased, mainframe and microcomputer. Include expenditures for maintenance. Include expenditures for equipment used to run information service products when that expenditure can be separated from the price of the product. Report expenditures for services provided by national, regional, and local bibliographic utilities, networks, consortia and commercial services. Report all fees and usage costs associated with such services as OCLC FirstSearch or electronic document delivery.

Note: Report only operating expenditures for access. These expenditures should also be included in Collection Expenditures or Other Operating Expenditures on the administrative entity screen. Do NOT report capital expenditures for items in this category.

Operating expenditures for library materials in electronic format. Operating expenditures for materials considered part of the collection, whether purchased or leased, such as CD-ROMs, magnetic tapes, and magnetic disks that are designed to be processed by a computer or similar machine. Examples are U.S. Census data tapes, locally-mounted databases, serials, and reference tools. Include operating expenditures for equipment when the cost is inseparably bundled into the price of the information service product. Exclude operating expenditures for library system software and microcomputer software used only by the library staff.

Note: These expenditures should also be included in Collection Expenditures or Other Operating Expenditures.

Operating income. This includes income used for operating expenditures. Include federal, state, or other grants. Do not include income for major capital expenditures, contributions to endowments, income passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year. Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds. See also State government operating income; Local government operating income; Other operating income; Federal government operating income, and Total operating income.

Appendix D—Glossary—Continued

Other operating expenditures. This includes all expenditures other than those for staff and collection.

Note: Include expenses such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs incurred in the operation and maintenance of physical facilities. See also Operating expenditures.

***Other operating income.** This is all income other than that reported by local, state, and federal government. Include, for example, monetary gifts and donations received in the current year, interest, library fines, and fees for library services. Do not include the value of any contributed or in-kind services or the value of any non-monetary gifts and donations. See also Operating income.

Other paid staff. This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff. See also Paid staff (full-time equivalent).

Outlet. See Public library service outlet.

***Paid staff (full-time equivalent).** Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE). See also Total paid employees.

Population of the legal service area. The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives income, plus any areas served under contract for which the library is the primary service provider.

Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center. The State Data Coordinator should obtain these figures annually from the State Data Center or other official state sources.

***Public library (FSCS definition).** A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following: 1) An organized collection of printed or other library materials, or a combination thereof; 2) Paid staff; 3) An established schedule in which services of the staff are available to the public; 4) The facilities necessary to support such a collection, staff, and schedule; and 5) Is supported in whole or in part with public funds.

Note: If the library meets all of the requirements of this definition, respond with a yes. If the library does not meet one or more of the requirements, respond with a no.

Public library service outlet. Public libraries can have one or more outlets that provide direct service to the public. The three types of public library service outlets included in this report are central outlets, branch library outlets, and bookmobile outlets. Information on a fourth type of outlet, books-by-mail only outlets, was collected but omitted from this report.

Public service hours/year. This is the sum of annual public service hours for outlets.

Note: Include the hours open for public service for centrals, branches, bookmobiles, and books-by-mail only. For each bookmobile, count only the hours during which the bookmobile is open to the public. For Administrative Entities that offer ONLY books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included. Extensive hours closed to the public due to natural disasters or other events should be excluded even if the staff is scheduled to work.

Public-use Internet terminals. See Internet terminals used by general public.

Appendix D—Glossary—Continued

***Reference transactions.** A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials, machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, by phone, by fax, by mail, or by electronic-mail from an adult, a young adult, or a child.

Do not count directional transactions or questions of rules or policies. Examples of directional transactions are “Where are the children’s books?” and “I’m looking for a book with the call number 811.2G.” An example of a question of rules or policies is “Are you open until 9:00 tonight?”

Note: If an actual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A “typical week” is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

Reporting period ending date. This is the latest date (month and year) for a 12-month period that applies to the state’s data being submitted to NCES.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the latest ending date.

Reporting period starting date. This is the earliest date (month and year) for a 12-month period that applies to the state’s data being submitted to NCES.

Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the earliest starting date.

Salaries and wages expenditures. This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions, but exclude employee benefits. See also Operating expenditures.

School district. An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes “dependent public school systems” of county, municipal, township, or state governments.

Serial subscription. See Subscriptions.

Service Outlet. See Public library service outlet.

Single direct service outlet. See Administrative entity with a single direct service outlet.

Size of book and serial collection. See Book/serial volumes.

Special library district (authority, board, commission). See Library district.

Square footage of outlet. Provide the area, in square feet, of the public library outlet (central library or branch). Report the total area in square feet for each library outlet (central library or branch) separately. This is the area on all floors enclosed by the outlet walls of the library outlet. Include all areas occupied by the library outlet, including those areas off-limits to the public. Include any areas shared with another agency or agencies if the outlet has use of that area.

Appendix D—Glossary—Continued

Staff (full-time equivalent). See Paid staff (full-time equivalent)

Staff expenditures. See Total staff expenditures.

State government operating income. These are all funds distributed to public libraries by state government for expenditure by the public libraries, except for federal money distributed by the state. This includes funds from such sources as penal fines, license fees, and mineral rights. See also Operating income.

***State library agency.** That agency within each of the states and territories which administers the federal Library Services and Technology Act funds and which is authorized by a state to develop library services in the state. It may also provide direct services to the public.

***Stationary Outlets.** The total number of branch library outlets and central library outlets.

Subscriptions. This refers to the arrangements by which, in return for a sum paid in advance, periodicals, newspapers, or other serials are provided for a specified number of issues. These are print and microfilm subscriptions only, not electronic or digital subscriptions. See also Library collection.

Note: Count print subscriptions purchased from the library's budget and those donated to the library as gifts. Count titles, including duplicates, not individual issues. Include the total number of subscriptions for all outlets.

Total capital outlay. See Capital outlay.

Total circulation. The total annual circulation of all library materials of all types, including renewals.

Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.

Total operating income. This includes income from the local government, the state government, the federal government, and all other income.

Total operating expenditures. This includes total expenditures on staff, total expenditures on collection, and other operating expenditures.

Note: Includes Operating Expenditures for Electronic Access and Operating Expenditures for Library Materials in Electronic Format.

Total paid employees. This is the sum of total librarians and all other paid staff.

Total staff expenditures. This includes salaries and wages and employee benefits. See also Operating expenditures.

***Total unduplicated population of legal service areas.** This is the total unduplicated population of those areas in your state that receive library services. The population of unserved areas is not included in this figure.

Note: A state's actual total population of legal service areas may be different from the total population of legal service areas as calculated by WinPLUS. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice in the WinPLUS calculation. For states that have no overlapping jurisdictions, this number will be identical to the state's total population of legal service areas as calculated by WinPLUS. For states that do have overlaps in population of legal service areas served by individual libraries, this number must be calculated separately.

Appendix D—Glossary—Continued

Use your state's most recent official state population figures for jurisdictions in your state as the basis for calculating the total unduplicated population of legal service areas.

Users of electronic resources per typical week. Number of users using electronic resources in the library in a typical week. Electronic resources include, but are not limited to, the Internet (WWW, email, telnet, other), online indexes, CD-ROM reference sources, software, and the online catalog. Do not include staff use of these resources.

Note: The number of users may be counted manually, using registration logs. Count each user that uses electronic resources, regardless of the amount of time spent on the computer. A user who uses the library's electronic resources three times a week would count as three customers. Software such as "Historian" can also be used to track the number of users at each public terminal.

Video. These are materials on which pictures are recorded, with or without sound. Electronic playback reproduces pictures, with or without sound, using a television receiver or monitor. See also Library collection.

Visits. See Library visits.

Web Address. This is the web address of the administrative entity.

***WinPLUS.** The Windows-based Public Library Universe System data collection software.

State Characteristics Data Element Definitions

Note: The items below are answered by the state library agency.

#	Data Element Name	Data Element Definition
01	State (Automatic Display)	This is the standard two-letter state abbreviation automatically assigned by WinPLUS.
02	FSCS Submission Year (Automatic Display)	This is the year in which these FSCS data are submitted to NCES and is automatically assigned by WinPLUS.
03	Reporting Period Starting Date	<p>This is the earliest date (month and year) for a 12-month period that applies to the state's data being submitted to NCES.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the earliest starting date.</p>
04	Reporting Period Ending Date	<p>This is the latest date (month and year) for a 12-month period that applies to the state's data being submitted to NCES.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the latest ending date.</p>
05	Official State Total Population Estimate	This is the most recent official total population figures for your state that matches the local population figures that you are submitting to NCES. The State Data Coordinator should obtain this figure annually from the State Data Center or other official state sources.
5A	Total Unduplicated Population of Legal Service Areas	<p>This is the total unduplicated population of those areas in your state that receive library services. The population of unserved areas is not included in this figure.</p> <p>Note: A state's actual total population of legal service areas may be different from the total population of legal service areas as calculated by WinPLUS. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice in the WinPLUS calculation. For states that have no overlapping jurisdictions, this number will be identical to your state's total population of legal service areas as calculated by WinPLUS. For states that do have overlaps in population of legal service areas served by individual libraries, this number must be calculated separately.</p> <p>Use your state's most recent official state population figures for jurisdictions in your state as the basis for calculating the total unduplicated population of legal service areas.</p>

Appendix E—Survey Instrument—Continued

Administrative Entity Data Element Definitions

Administrative Entity. (This is not a WinPLUS Data Element.) This is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single outlet, or it may have more than one outlet.

Note: Do not report “administrative entities only” for purposes of this survey.

#	Data Element Name	Data Element Definition
01	LIB ID (Optional)	This is the state-assigned identification code for the administrative entity.
1A	FSCS ID (Automatic Display)	This is the identification code assigned by NCES to the administrative entity.
02	Name	This is the legal name of the administrative entity. Note: Provide the name of the public library.
03	Street Address	This is the complete street address of the administrative entity. Note: Do not report a post office box or general delivery.
3M	Mailing Address	Definition: This is the mailing address of the administrative entity.
04	City (of street address)	This is the city or town in which the administrative entity is located.
4A	County of the Entity	This is the county in which the administrative entity is located.
4M	City (of mailing address)	This is the city or town of the mailing address for the administrative entity.
05	Zip (of street address)	This is the standard five-digit postal zip code for the street address of the administrative entity.
5M	Zip (of mailing address)	This is the standard five-digit postal zip code for the mailing address of the administrative entity.
06	Zip4 (of street address)	This is the four-digit postal zip code extension for the street address of the administrative entity.
6M	Zip4 (of mailing address)	This is the four-digit postal zip code extension for the mailing address of the administrative entity.
07	Phone	This is the telephone number of the administrative entity, including area code. Note: Report telephone number without spacing or punctuation.
7A	Web Address *	This is the Web address of the administrative entity. http://_____
7B	Fax Number of Director *	(This item was collected but not included on the data file.)
7C	E-mail Address of Director *	(This item was collected but not included on the data file.)
7D	Interlibrary Relationship Code	Select one of the following: HQ—Headquarters of a System, Federation, or Cooperative Service. (Include any system, federation, or cooperative service member acting in this role.) ME—Member of a System, Federation, or Cooperative Service, but not the headquarters. NO—Not a Member of a System, Federation, or Cooperative Service.

Appendix E—Survey Instrument—Continued

HQ—Headquarters of a System, Federation, or Cooperative Service. The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the system, federation, or cooperative service. Note: Agencies that serve other libraries rather than the public should not be reported to FSCS.

ME—Member of a System, Federation, or Cooperative Service. An autonomous library joined by formal or informal agreement(s) with other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc. This does include libraries that are part of national, multi-state or statewide library systems, federations, or cooperative services. (Do not respond 'Yes' if you belong to OCLC.) This does not include multiple-outlet administrative entities (e.g., libraries with branches that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library.

7E Legal Basis Code

The legal basis is the type of local government structure within which the entity functions. It reflects the state or local law which authorizes the library.

Select one of the following:

CI—Municipal Government (city, town or village)
CO—County/Parish
CC—City/County
MJ—Multi-jurisdictional
NL—Native American Tribal Government
NP—Non-profit Association or Agency
SC—School District
SD—Special Library District (authority, board, commission)
OT—Other

CI—Municipal Government (city, town or village). A municipal government is an organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

CO—County/Parish. An organized local government authorized in a state's constitution and statutes and established to provide general government.

CC—City/County. A multi-jurisdictional entity that is operated jointly by a county and a city.

MJ—Multi-jurisdictional. An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.

Note: Please put city/county combinations under 'CC', rather than under Multi-jurisdictional.

NL—Native American Tribal Government. An organized local government authorized and established to provide general government to residents of a Native American reservation.

Note: Include native Alaskan villages in this category.

NP—Non-profit Association or Agency. An entity privately controlled but meeting the statutory definition of a public library in a given state; includes association libraries.

Appendix E—Survey Instrument—Continued

SC—School District. An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes "dependent public school systems" of county, municipal, township, or state governments.

SD—Special Library District (authority, board, commission). This is a district, authority, board or commission authorized by state law to provide library services.

OT—Other.

7F Administrative Structure Code

This code identifies an autonomous library entity that has its own governance and funding.

Select one of the following:

MA—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Separate

MO—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate

SO—Administrative Entity with a Single Direct Service Outlet

MA—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of central library(ies), branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

MO—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of a central library(ies), branch(es), bookmobile(s), and/or books-by-mail only.

SO—Administrative Entity with a Single Direct Service Outlet. An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

7G FSCS Public Library Definition

Answer <Y>es or <N>o to the following question: "Does this public library meet all the criteria of the FSCS public library definition?"

A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following:

1. an organized collection of printed or other library materials, or a combination thereof;
2. paid staff;
3. an established schedule in which services of the staff are available to the public;
4. the facilities necessary to support such a collection, staff, and schedule; and
5. is supported in whole or in part with public funds.

Note: If the library meets all of the requirements of this definition, respond with a yes. If the library does not meet one or more of the requirements, respond with a no.

Appendix E—Survey Instrument—Continued

- 7H Geographic Code
- Choose from among the following types of readily available Census geography, one code that either exactly or most nearly describes the geographic area for which the public library has been established to offer services and from which (or on behalf of which) the library derives income and any areas served under contract for which the library is the primary service provider.
- Note: The Population of Legal Service Area (data element #08) should be reflected in the geographic code selected.
- CI1—City (exactly)
CI2—City (most nearly)
CO1—County (exactly)
CO2—County (most nearly)
MA1—Metropolitan Area (exactly)
MA2—Metropolitan Area (most nearly)
MC1—Multi-County (exactly)
MC2—Multi-County (most nearly)
SD1—School District (exactly)
SD2—School District (most nearly)
OTH—Other
- 08 Population of the Legal Service Area
- The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives income, plus any areas served under contract for which the library is the primary service provider.
- Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center. The State Data Coordinator should obtain these figures annually from the State Data Center or other official state sources.
- 09 Number of Central Libraries
- This is one type of single outlet library (SO) or the library which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.
- Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. In the administrative entity file, this simply means reporting “0” or “1” for central library. Where two or more libraries are considered “centrals” for state or local purposes, one central library and one or more branch libraries should be reported to FSCS. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library for FSCS purposes, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.
- 10 Number of Branch Libraries
- A branch library is an auxiliary unit of an administrative entity which has at least all of the following:
1. separate quarters;
 2. an organized collection of library materials;
 3. paid staff; and
 4. regularly scheduled hours for being open to the public.

Appendix E—Survey Instrument—Continued

- 11 Number of Bookmobiles A bookmobile is a traveling branch library. It consists of at least all of the following:
1. a truck or van that carries an organized collection of library materials;
 2. paid staff; and
 3. regularly scheduled hours (bookmobile stops) for being open to the public.
- Note: Count the number of vehicles in use, not the number of stops the vehicle makes.

- 12 Number of Books-by-Mail Only The automatic display of this outlet record item was discontinued.

PAID STAFF (FULL-TIME EQUIVALENT)

Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE). For example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs.

- 13 ALA-MLS Librarians with master's degrees from programs of library and information studies accredited by the American Library Association.
- 14 Total Librarians Persons with the title of librarian who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS (data element #13).
- 15 All Other Paid Staff This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff.
- 16 Total Paid Employees This is the sum of total librarians (data element #14) and all other paid staff (data element #15).

OPERATING INCOME

Report income used for operating expenditures as defined below. Include federal, state, or other grants. DO NOT include income for major capital expenditures, contributions to endowments, income passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year. (Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds.)

- 17 Local Government Income This includes all tax and non-tax receipts designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, fines, or fees.
- 18 State Government Income These are all funds distributed to public libraries by State government for expenditure by the public libraries, except for federal money distributed by the State. This includes funds from such sources as penal fines, license fees, and mineral rights.
- 19 Federal Government Income This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the State.
- 20 Other Income This is all income other than that reported by local, State, and federal (data elements #17, #18, and #19). Include, for example, monetary gifts and donations received in the current year, interest, library fines, and fees for library services. Do not include the value of any contributed or in-kind services or the value of any nonmonetary gifts and donations.

Appendix E—Survey Instrument—Continued

- 21 Total Income This includes income from the local government, the State government, the federal government, and all other income (the sum of data elements #17 through #20).

OPERATING EXPENDITURES

Operating expenditures are the current and recurrent costs necessary to support the provision of library services. Significant costs, especially benefits and salaries, that are paid by other taxing agencies (government agencies with the authority to levy taxes) "on behalf of" the library may be included if the information is available to the reporting agency. Only such funds that are supported by expenditure documents (such as invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Estimated costs are not reported.

- 22 Salaries & Wages Expenditures This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions but exclude employee benefits.
- 23 Employee Benefits Expenditures These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts for direct paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection, unemployment compensation, workmen's compensation, tuition, and housing benefits.
- 24 Total Staff Expenditures This includes salaries and wages (data element #22), and employee benefits (data element #23).
- 25 Collection Expenditures This includes all expenditures for materials purchased or leased for use by the public. It includes print materials, microforms, machine-readable materials, audiovisual materials, etc..
- 26 Other Operating Expenditures This includes all expenditures other than those for staff (data element #24) and collection (data element #25).
- Note: Include expenses such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs incurred in the operation and maintenance of physical facilities.
- 27 Total Operating Expenditures This includes total expenditures on staff, total expenditures on collection, and other operating expenditures (data elements #24, #25, and #26).
- Note: Includes Operating Expenditures for Electronic Access (data element #45) and Operating Expenditures for Library Materials in Electronic Format (data element #44).
- 28 Capital Outlay These are funds for the acquisition of or additions to fixed assets such as building sites, new buildings and building additions, new equipment, initial book stock, furnishings for new or expanded buildings, and new vehicles. This excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.
- Note: Local accounting practices shall determine whether a specific item is a capital expense or an operating expense regardless of the examples in the definition.

LIBRARY COLLECTION

Note: Report physical units for items 29–34. For smaller libraries when volume data are not available, title information may be substituted. Items which are packaged together as a unit (e.g., two compact discs or two video cassettes) and are generally checked out as a unit, should be counted as one physical unit.

Appendix E—Survey Instrument—Continued

- 29 Book/Serial Volumes Books are non-periodical printed publications bound in hard or soft covers, or in loose-leaf format. Serials are publications issued in successive parts, usually at regular intervals, and as a rule intended to be continued indefinitely. Serials include periodicals (magazines), newspapers, annuals (reports, year-books, etc.), memoirs, proceedings, and transactions of societies. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume.
- 30 Audio These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically or electronically, or both. Included are records, audiocassettes, audio cartridges, audiodiscs, audioreels, talking books, and other sound recordings.
- 31 (This item is reserved for future use.)
- 32 Video These are materials on which pictures are recorded, with or without sound. Electronic playback reproduces pictures, with or without sound, using a television receiver or monitor.
- 33 Subscriptions This refers to the arrangements by which, in return for a sum paid in advance, periodicals, newspapers, or other serials are provided for a specified number of issues. These are print and microfilm subscriptions only; not electronic or digital subscriptions.
- Note: Count print subscriptions purchased from the library's budget and those donated to the library as gifts. Count titles, including duplicates, not individual issues. Include the total number of subscriptions for all outlets.
- 34 Materials in Electronic Format ** Report the number of physical units such as CD-ROMS, diskettes, etc., that are designed to be processed by a computer. Examples are government documents, reference tools or serials distributed on CD-ROM or other portable digital carrier, locally mounted databases, diskettes or magnetic tapes. Exclude bibliographic records used to manage the collection, library system software, and microcomputer software used only by the library staff.

SERVICES

- 35 Public Service Hours per Year This is the sum of annual public service hours for outlets.
- Note: Include the hours open for public service for centrals (data element #9), branches (data element #10), bookmobiles (data element #11), and books-by-mail only. For each bookmobile, count only the hours during which the bookmobile is open to the public. For Administrative Entities that offer ONLY books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included, however, extensive hours closed to the public due to natural disasters or other events should be excluded even if the staff is scheduled to work.
- 36 Library Visits This is the total number of persons entering the library for whatever purpose during the year.
- Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).
- 37 (This item is reserved for future use.)

Appendix E—Survey Instrument—Continued

- 38 Reference Transactions
- A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials, machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, or by phone, fax, mail, or electronic mail from an adult, a young adult, or a child.

Do not count directional transactions or questions of rules or policies. Examples of directional transactions are "Where are the children's books?" and "I'm looking for a book with the call number 811.2G." An example of a question of rules or policies is "Are you open until 9:00 tonight?"

Note: If an annual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

- 39 Total Circulation
- The total annual circulation of all library materials of all types, including renewals.

Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.

INTER-LIBRARY LOANS

- 40 Provided To
- These are library materials, or copies of the materials, provided by one library to another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

- 41 Received From
- These are library materials, or copies of the materials, received by one library from another library upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

CHILDREN'S SERVICES

- 42 Circulation of Children's Materials
- The total annual circulation of all children's materials in all formats to all users. It includes renewals.

- 43 Children's Program Attendance
- The count of the audience at all programs for which the primary audience is children. Includes adults who attend programs intended primarily for children.

Note: *Output Measures for Public Library Service to Children; A Manual of Standardized Procedures* (ALA, 1992) defines children as persons age 14 and under.

ELECTRONIC TECHNOLOGY

- 44 Operating Expenditures for Library Materials in Electronic Format
- Report operating expenditures for materials considered part of the collection, whether purchased or leased, such as CD-ROMs, magnetic tapes, tapes, and magnetic discs, that are designed to be processed by a compu-

Appendix E—Survey Instrument—Continued

- (also include in #25 or #26)
- ter or similar machine. Examples are U.S. Census data tapes, locally-mounted databases, serials, and reference tools. Include operating expenditures for equipment when the cost is inseparably bundled into the price of the information service product. Exclude operating expenditures for library system software and microcomputer software used only by the library staff.
- Note: These expenditures should also be included in Collection Expenditures (data element #25) or Other Operating Expenditures (data element #26) on the administrative entity screen.
- 45 Operating Expenditures for Electronic Access
(also include in #25 or #26)
- Report all operating expenditures from the library budget associated with access to electronic materials and services. Include computer hardware and software used to support library operations, whether purchased or leased, mainframe and microcomputer. Include expenditures for maintenance. Include expenditures for equipment used to run information service products when that expenditure can be separated from the price of the product. Report expenditures for services provided by national, regional, and local bibliographic utilities, networks, consortia and commercial services. Report all fees and usage costs associated with such services as OCLC FirstSearch or electronic document delivery.
- Note: Report only operating expenditures for access. These expenditures should also be included in Collection Expenditures (data element #25) or Other Operating Expenditures (data element #26) on the administrative entity screen. Do NOT report capital expenditures for items in this category.
- 46
- (This item is reserved for future use.)
- 47 Access to Electronic Services
- Answer <Y>es, <N>o, or <M>issing (unknown, not reported) to the following question: "Does your library provide access to electronic services (e.g., bibliographic and full-text databases, multi-media products)?"
- These are electronic services provided due to subscription, lease, license, consortial membership or agreement. Include full-text serial subscriptions and electronic databases received by the library or an organization associated with the library.
- 48 Access to Internet
- Answer <Y>es, <N>o, or <M>issing (unknown, not reported) to the following question: "Does the public library have access to the Internet?"
- The Internet is the collection of networks that connects government, university, and commercial agencies (e.g., NSFNET, WestNet, etc.) and is unified by the use of a single protocol suite, TCP/IP.
- Report the library as providing Internet access only if one or more of the following services are accessible: telnet, gopher, file transfer protocol, or community network. Do not report a library that has access to electronic mail only.
- 49
- (This item is reserved for future use.)
- 50 Number of Internet Terminals Used by Staff Only
- Number of computer terminals (PC, 'dumb terminal', etc.) used by staff only in the library that are used to connect to the Internet (text only, graphical, etc.).
- 51 Number of Internet Terminals Used by General Public
- Number of computer terminals (PC, 'dumb terminal', etc.) used by the general public in the library that are used to connect to the Internet (text only, graphical, etc.).
- 52 Number of Users of Electronic Resources Per Typical Week
- Count the number of users using electronic resources in the library in a typical week. Electronic resources include, but are not limited to, Internet (WWW, email, telnet, other), online indexes, CD-ROM reference sources, software, and the online catalog. Do not include staff use of these resources.

Appendix E—Survey Instrument—Continued

Note: The number of users may be counted manually, using registration logs. Count each user that uses electronic resources, regardless of the amount of time spent on the computer. A user who uses the library's electronic resources three times a week would count as three customers. Software such as "Historian" can also be used to track the number of users at each public terminal.

* New data item.

**Definition revised. This item (Materials in Electronic Format) is also renumbered and relocated.

Note: Internet Use Code was deleted. Some of the data element names that appear on the WinPLUS data entry screens are abbreviated.

Appendix E—Survey Instrument—Continued

Outlet Data Element Definitions

#	Data Element Name	Data Element Definition
01	LIB ID (Optional)	This is the state-assigned identification code for the outlet.
1A	FSCS ID (Automatic Display)	This is the identification code assigned by NCES. Outlets are assigned the same FSCS ID as the administrative entity to which they belong, with a unique three-digit suffix added to distinguish each outlet.
02	Name	This is the name of the outlet.
03	Street Address	This is the complete street address of the outlet. Note: Do not report a post office box or general delivery. For a bookmobile that operates from an administrative entity, branch, or central library, report the address of the administrative entity, branch or central library from which it operates. For a bookmobile that is itself the administrative entity, report the address where the bookmobile is parked at night.
04	City	This is the city or town in which the outlet is located.
05	County of the Outlet	This is the county in which the outlet is located.
06	Zip	This is the standard five-digit postal zip code for the street address of the outlet.
07	Zip4	This is the four-digit postal zip code extension for the street address of the outlet.
08	Phone	This is the telephone number of the outlet, including area code. Note: Report telephone number without spacing or punctuation.
09	Outlet Type Code	An outlet is a unit of an administrative entity that provides direct public library service. Select one of the following: BM—Books-by-Mail Only BR—Branch Library BS—Bookmobile(s) CE—Central Library BM—Books-by-Mail Only. A direct mail order service which provides books and other library materials. Books-by-mail typically serves rural residents, the disabled, the homebound, and others without access to another type of public library outlet. Requests for materials are usually received by mail and by telephone only. Only books-by-mail services that are housed separately from any other type of direct public service outlet (that is, central library, branches, or bookmobiles) should be coded here. BR—Branch Library. A branch library is an auxiliary unit of an administrative entity which has at least all of the following: 1. separate quarters; 2. an organized collection of library materials; 3. paid staff; and 4. regularly scheduled hours for being open to the public.

Appendix E—Survey Instrument—Continued

BS—Bookmobile(s). A bookmobile is a traveling branch library. It consists of at least all of the following:

1. a truck or van that carries an organized collection of library materials;
2. a paid staff; and
3. regularly scheduled hours (bookmobile stops) for being open to the public.

Note: A separate outlet record may be created for each bookmobile. You may wish to create separate outlet records for individual bookmobiles if (1) they have different addresses and/or (2) they have different Metropolitan Status Codes. Alternatively, a bookmobile outlet record may include more than one bookmobile.

CE—Central Library. This is one type of single outlet library (SO) or the library which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library for FSCS purposes, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.

10 Metropolitan Status Code

Select one of the following. Bookmobiles should report the code which best describes their primary service area.

CC—Within the City Limits of the Central City of a Metropolitan Area

NC—Metropolitan Area, but Not Within Central City Limits

NO—Not in a Metropolitan Area

M—Missing (Unknown, Not Reported)

Note: Contact the State Data Center for specific information about Metropolitan Areas in your state.

CC—Central City. The largest central city and, in some cases, up to two additional central cities are included in the title of the Metropolitan Area; there also are central cities that are not included in a Metropolitan Area title. A Metropolitan Area central city does not include any part of that city that extends outside the Metropolitan Area boundary.

NC—Metropolitan Area, but not within central city limits. A large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some Metropolitan Areas are defined around two or more nuclei. Each Metropolitan Area must contain a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total Metropolitan Area population of at least 100,000 (75,000 in New England). A Metropolitan Area comprises one or more central counties. (Independent cities are considered county equivalents.) A Metropolitan Area may also include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, Metropolitan Areas are composed of cities and towns rather than whole counties.

Appendix E—Survey Instrument—Continued

- 11 Square Footage of Outlet * Provide the area, in square feet, of the public library outlet (central library or branch). Report the total area in square feet for each library outlet (central library or branch) separately. This is the area on all floors enclosed by the outer walls of the library outlet. Include all areas occupied by the library outlet, including those areas off-limits to the public. Include any areas shared with another agency or agencies if the outlet has use of that area.
- 12 Number of Bookmobiles in the Bookmobile Outlet Record The number of bookmobiles in the bookmobile outlet record.
- Note: A bookmobile outlet record may include one or more bookmobiles. Complete this data element only if the outlet record is of the type BS—Bookmobile(s) (see outlet data element #9). A bookmobile is a traveling branch library. It consists of at least all of the following:
1. a truck or van that carries an organized collection of library materials;
 2. a paid staff; and
 3. regular scheduled hours (bookmobile stops) for being open to the public. Count vehicles in use, not the number of stops the vehicle makes.

* New data item.

NOTE: Web Address was deleted from outlet file (now collected on administrative entity file).
