

SEPP Projects

- Three main project areas are emerging:
 - Sakai API development
 - Content authoring and management
 - Migration and interchange
- In addition, you might be interested in:
 - ePortfolio work (OSPI)
 - Portal work (uPortal, JSR-168)

Sakai API Development

- There are two levels of opportunity:
 - Identifying and developing common service APIs and implementations.
 - Creating OKI plug-ins and adapters for enterprise services.
 - I am writing a paper on how the IMS Enterprise specification can be used as a generic plug-in to communicate with services such as PeopleSoft, etc.
- Contact Mark Norton if you are interested!

Content Tools

- Several projects are starting to form around content tools:
 - Presentation Tool (slide shows) – Mark Norton
 - ETUDES migration – Vivian Sinou
- Others might emerge from discussion:
 - Content management tools
 - Pedagogy specific tools like VUE
- Send mail to Dirk Herr-Hoyman

Migration Tools

- The Migration Group has completed its survey (Robert will speak more on this).
- Work will start soon on examining packages exported from legacy CMS.
- Explore content representation in Sakai.
- Consider data interchange standards.
- Send mail to Robert Catalano.

Sakai 3.0 Requirements

- Work on Sakai 2.0 Requirements is being finalized by the Sakai Tools group.
- The SEPP Requirements group is gathering requirements for Sakai 3.0.
- Now is the time to start thinking about your future needs and submitting them.
- Send mail to Mara Hancock.
