| Education | Princeton University |

Summary

I work to create self-sustaining, global-scale, collaborative, open-licensed projects that help nonprofits--including NGOs and government agencies--to substantially improve their mission-performance. I have been involved with guiding nearly two-dozen such projects toward and into fully self-sustaining status, in fields including the arts, conservation, cultural heritage (libraries, museums, and historical societies), economic development, education, health, the humanities, and social services. Our projects are distinctive among charitable initiatives in that they achieve exceptional scale and sustainability (most operate globally; all are self-sustaining), enabling them to deliver extraordinary social impact and achieve social transformations previously thought impossible. They change lives, create jobs, and improve social justice outcomes. Perhaps most importantly, they are force-multipliers: they reliably improve the abilities of their nonprofit participants to pursue their own missions more effectively.

Specialties: open-source software, open technology, open educational resources, technology strategic planning, open health IT, libraries, cultural heritage, wildlife conservation, uPortal, Sakai, Quali, KFS, Quali Student, Quali Coeus, Quali OLE, OpenCast, CollectionSpace, ConservationSpace, ResearchSpace, Zotero, Sophie, Visual Understanding Environment, VUE, FEDORA, DuraSpace, Zotero, Project Bamboo, Project Audience, Artful.ly, ArtsReady, FLUID, SEASR, SMART, Kaleidoscope, Mindspring

Experience

Executive Director

CollaborationSource

January 2011 – Present (3 years 1 month)

From

www.linkedin.com/profile/view?id=11807103&locale=en_US&trk=tyah&trkInfo=tas%3Achristopher%2Cidx%3A2-1-2

CollaborationSource is a startup 501(c)(3) nonprofit that provides kickstart funding and an effective success-strategy to groups of nonprofits for open-source IT projects that achieve large social impact, using an innovative model called 'community sourcing'.

Member, Board of Trustees

Fractured Atlas

October 2010 – Present (3 years 4 months)

From the Web site: "Fractured Atlas is a non-profit organization that serves a national community of artists and arts organizations. Our programs and services facilitate the creation of art by offering vital support to the artists who produce it. We help artists and arts organizations function more effectively as businesses by providing access to funding, healthcare, education, and more, all in a context that honors their individuality and independent spirit. By nurturing today's talented but underrepresented voices, we hope to foster a dynamic and diverse cultural landscape of tomorrow." <http://www.fracturedatlas.org>

Member, Board of Directors

rSmart

July 2010 – Present (3 years 7 months)

From the rSmart Web site: "rSmart is different. We don't build software. We make the software built by higher education very friendly, and then we do a tremendous job supporting you to use it." <http://www.rsmart.com>

Technology Adviser, Vital Signs Program

Gulf of Maine Research Institute

October 2007 – Present (6 years 4 months)

Vital Signs links 7th and 8th grade students and scientists in the rigorous collection and analysis of essential environmental data across freshwater and coastal ecosystems. Innovative technology, relevant content, and critical partnerships create an authentic science learning experience for students, a distributed data gathering network for scientists, and a statewide community of teachers, students, and scientists collaborating to learn about and steward the Gulf of Maine watershed. <http://www.gmri.org/education/vitalsigns.asp>

Executive Vice-President and Chief Innovation Officer

Open Health Tools

2010 – 2011 (1 year)

OHT acts as the sinew of a worldwide community of government agencies, commercial solution providers, philanthropies, and nonprofit organizations working together to bring open-licensed health delivery IT to 40% of the world's population over the next three years. I led the development of OHT's strategy and long-term priorities. I also guided OHT's efforts to engage with, coordinate, and facilitate open healthcare technology projects that align with our mission and principles.

Associate Program Officer, Program in Research in Information Technology

Andrew W. Mellon Foundation

May 2006 – January 2010 (3 years 9 months)

Grantmaker and strategist for one of the largest private-philanthropic funders of open-source software development in the world, operating on a modified venture-philanthropic model, with a strong emphasis on project sustainability and on direct, measurable benefit to Mellon's core constituencies: the arts and humanities in higher education; research libraries; museum conservation science; performing arts; and conservation biology. Some of the larger projects we have supported include: Sakai (www.sakaiproject.org); the Kuali suite (financials, research administration, student information systems: www.kuali.org); FLUID (www.fluidproject.org); SEASR (www.seasr.org); the FEDORA repository system (www.duraspace.org); and Zotero (www.zotero.org).

Researcher, Instructor, Higher Education Administrator

Princeton University

1999 – 2006 (7 years)

From

www.linkedin.com/profile/view?id=11807103&locale=en_US&trk=tyah&trkInfo=tas%3Achristopher%2Cidx%3A2-1-2

Christopher J. Mackie, Ph.D

rSmart Board of Directors

Christopher J. Mackie, Ph.D. is a technology professional with more than 20 years of leadership, management, philanthropic, and consulting experience in the for-profit and nonprofit sectors, including: education; healthcare; information technology; libraries; museums; the arts; and environmental protection.

Chris has been a technology change-agent throughout his career. After college, he participated in a series of startup ventures in healthcare and information technology. He then returned to graduate school in order to study policy making and leadership in higher education, as part of a successful transition to the nonprofit sector. While a graduate student, he also served as a consultant, researcher, and evaluator for state-level educational policy and regulatory agencies.

Most recently, Chris served as a program officer for the Program in Research in Information Technology (RIT) at The Andrew W. Mellon Foundation. RIT's mission was to support the development of information technology infrastructure and applications aligned with the nonprofit missions of Mellon's grantees in higher education, libraries, museums, arts organizations, and environmental conservation. At Mellon, Chris helped to guide more than a dozen global-scale, collaborative, open-source software projects—including Sakai and Kuali—toward and into wholly self-sustaining status.

Chris has consulted with a wide range of domestic and international nonprofits and NGOs on strategic technology planning, organizational design, leadership development, and institutional advancement. He serves on the Board as technology adviser to several nonprofit and for-profit ventures. A published scholar on education, energy, healthcare, and information technology policy, and a sought-after speaker on topics such as cyberinfrastructure, technology policy, technology strategy, and technology funding, he holds an A.B in International Studies from the University of North Carolina—Chapel Hill, an M.Ed. in higher education policy from the University of Michigan, and an M.P.P. and Ph.D. in International and Public Affairs from Princeton University. He lives in Princeton, NJ and New York City.

Christopher J. Mackie, Ph.D., has more than 20 years of research, teaching, leadership, management, philanthropic, and consulting experience in nonprofits, philanthropy, and academia. He is Executive Director of CollaborationSource, a nonprofit organization that facilitates sustainable, large-scale, collaborative solutions to public-sector social challenges in fields including education, healthcare, and wildlife conservation. Chris participated in the design of Project Kaleidoscope, and is facilitating the launch of the Mindspring Initiative, both projects focusing on open educational resources (OER).

Before founding CollaborationSource, Chris was a program officer at The Andrew W. Mellon Foundation. He is an award-winning higher education administrator, teacher, and researcher, and formal and informal adviser to some of the world's leading philanthropies. He holds an A.B. in International Studies from UNC-Chapel Hill, an M.Ed. from the University of Michigan, and an M.P.P. and Ph.D. in International and Public Affairs from Princeton University.

Home

At CollaborationSource, we help nonprofits, NGOs, and government agencies to transform themselves and their environments to accomplish their missions, by collaborating on the development of high-performing information technologies using a methodology called *community sourcing*.

About
Us

Over the last 10 years, our team has initiated and supported community sourcing projects benefitting thousands of nonprofits worldwide, serving tens of millions of people daily, and delivering hundreds of millions of dollars in economic and social benefits.

MISSION

CollaborationSource helps mission-driven organizations* to organize themselves to solve together the mission-critical business problems that they have found difficult or impossible to solve when acting independently, by collaboratively designing, building, owning, governing, and sustaining open-licensed, mission-aligned information technologies.

* *Mission-driven organizations = nonprofits, NGOs, government agencies*

VISION

CollaborationSource works to achieve a world where mission-driven organizations:

- Use mission-aligned information technology to achieve their missions at high levels of performance, enhancing the organization's agility, self-determination, and sustainability
- Collaborate effectively to pursue shared solutions to shared opportunities and challenges
- Use collaborative approaches to overcome previously intractable, large-scale social problems

Note: The Internal Revenue Service lists 11 503(c) organizations that begin with the characters "collaboration." But at this time *CollaborationSource* and *Collaboration Source* were not included.

Similarly *Guidestart* does not have any IRS 990 listing for either organization name.
