WSRP Conformance SC

Eighth face to face meeting
March 1st – 4th, 2004

Status

- Conformance statements extracted from the specification.

- Assertions written for all conformance statements.

- Assertions written for areas not covered by conformance statements, but uncovered as important areas by Interoperability SC.

- IBM recently updated a test kit on alphaWorks which implements a growing set of these assertions. This test kit is based on the Eclipse testing framework originally developed by WS-I.

- Releasing this test case source code as an open source project is being reviewed.

Certification?

- **Initial discussions:**
  - **WS-I**
    - Is chartered to subset groups of specifications for the purpose of enhancing interoperability of implementations.
    - Produces tests, but does not do certification testing.
    - Has expressed interest in a WSRP Profile, but would prefer the TC do all it can relative to conformance first.
  - **OASIS**
    - Staff has been recently tasked with assisting TCs in setting up conformance certification procedures.
    - Jamie Clark has been in contact with a number of testing firms.
