

International Institute of Infonomics

“The International Institute of Infonomics has been set up by the University of Maastricht, the ‘Hogeschool Zuyd’ (a cluster of regional universities of professional education), and international institutes such as MERIT and the Maastricht McLuhan Institute.”

“Infonomics is defined as the interdisciplinary science studying the digitisation of society. The institute brings together insights from a variety of fields, ranging from anthropology, linguistics, law, mathematics, to communication science, sociology, economics and business studies.”
